Quarterly Tables Financial Sector Q3 2022

General note to the tables

Figures in the tables are quoted in millions of Aruban florin (Afl.), unless otherwise stated. The sum of separate items may differ in the final digit from the total shown, due to rounding.

Data are subject to revision if additional information becomes available.

The following symbols and conventions are used throughout the tables:

blank: not available

0.0: nil

(d): discontinuity in the series; this sign will be accompanied by an explanatory note in the back section of the report.

Explanatory notes to the tables

Table 2.1 Monetary survey

The monetary survey consolidates the accounts of the Centrale Bank van Aruba (CBA), the commercial banks, and the government, related only to the issuance of components of money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sectors, whose liabilities include the money supply, and other sectors of the economy.

Net claims on public sector:

Gross claims

Resulting from the issuance of coins and treasury bills. Gross claims include loans granted, as well as government bonds in the hands of the monetary sector.

Net foreign assets:

Centrale Bank van Aruba

Revaluation differences of gold, official foreign exchange and security holdings are excluded in order to calculate the net flow of foreign funds by the nonmonetary sectors.

Table 2.2 Components of broad money

"Money" consists of bank notes, coins and demand deposits of the private sector. It does not include government deposits, neither the deposits of the commercial banks with the CBA, nor their cash holdings. "Quasi-money" comprises time and savings deposits with the commercial banks and the CBA, as well as treasury bills held by the private sector. This table shows the total

liquid claims of the domestic private sector on money-creating institutions.

Table 2.3 Causes of changes in broad money

This table reflects the causes of changes in broad money broken down in net foreign assets and net domestic assets. The latter include the non-credit-related balance sheet items of the money-creating institutions.

Inflow of foreign funds

Financial flows arising from changes in market prices and exchange rates of gold, official foreign exchange and security holdings are excluded in order to calculate the net flow of foreign funds by the nonmonetary sectors.

Table 2.4 Foreign assets

Aruba's net foreign assets consist mainly of convertible claims on nonresidents and gold less convertible liabilities to nonresidents, including revaluation of gold. Aruba has no accounts with the International Monetary Fund, because it participates in this institution as part of the Kingdom of the Netherlands. Until the end of 2000, the gold holdings of the CBA was valued once every three years at the lowest yearly average market price of gold, converted into florin, in the three calendar years preceding the date of valuation, less 30 percent. Since December 31, 1998, gold has been valued at Afl. 368.58 (previously: Afl. 450.74) per fine troy ounce. Effective December 31, 2001, gold is valued on a quarterly basis at the prevailing market rate. Financial flows arising from changes in these market prices and exchange rates

of gold, official foreign exchange and security holdings of the CBA are included in the revaluation account.

Column:

(9) Revaluation differences

Revaluation account for gold, official foreign exchange and security holdings.

Table 3.1 Consolidated balance sheet of the money-creating institutions

Money-creating institutions

These are the CBA, the government and the commercial banks.

Claims on money-creating institutions:

Monetary authorities

These are institutions (the CBA and the government) that create base money.

Other domestic assets

Mainly equipment and miscellaneous items.

Revaluation differences

Revaluation account for gold, official foreign exchange and security holdings. In accordance with the Central Bank Ordinance as revised in December 1989, valuation changes arising from changes in the market prices and exchange rates of gold, official foreign exchange and security holdings are accounted for in a revaluation reserve.

Other domestic liabilities

Money in custody, miscellaneous items and other liabilities.

Table 3.2 Detailed balance sheet of the Centrale Bank van Aruba

Columns:

(2) Other

Mainly equipment and miscellaneous items.

(5 and 6) Foreign assets:

Claims on banks

Balances with foreign central and commercial banks in convertible and other currencies.

Claims on governments

Treasury bills and other securities issued by foreign governments and international organizations in convertible and other currencies.

(11) Bank notes issued

Bank notes held by the public and commercial banks.

(14) Official entities

(17) Other financial institutions' deposits

(18) Private sector

Includes business enterprises, individuals, nonbank financial institutions and foundations.

(19) Other

Money in custody, other liabilities and the CBA's current net income position.

Table 3.4 Coins issued

The government issues coins, which are, therefore, its liability. The CBA buys the coins and resells them at face value to the commercial banks and to the public.

Table 4.1 Commercial banks: summary account

Commercial banks are financial institutions licensed to carry out banking operations with residents. These banks grant loans, and have among their liabilities deposits transferable by check or otherwise usable in making payments.

Commercial banks' transactions resulting in claims on, and liabilities to, nonresidents are included in this balance sheet only if these transactions are an integral part of their total activities. Offshore businesses sheltered in a separate accounting unit (where claims on nonresidents are kept equal to liabilities to nonresidents so that no net open position arises) are not included in this balance sheet.

Column:

(7) Capital and reserves:

Includes subordinated debt.

Table 4.3 Commercial banks: detailed balance sheet

These tables provide a distribution of resident commercial loans to economic sectors according to the third revision of the International Standard Industrial Classification (ISIC) of all economic activities of 1990 of the United Nations. Table 4.4 gives an overview of the outstanding commercial loans, loans to government and to individuals of the banking sector, divided in three categories, i.e., current accounts, term loans and mortgages, and their contribution in total loans, for the period under review. Table 4.5 gives a historic overview of the outstanding loans of the banking sector provided in Table 4.4.
