Issue no. 435

Cover design:

Mangroves are hotspots of biodiversity, connecting life on land with life below water. These 'forests of the sea' are essential to the health and vibrancy of our coastal ecosystems, including our community livelihoods. They provide a vital habitat for marine life, help to protect against coastal erosion and storm surges, as well as filter pollutants from the sea. Mangroves are one of nature's most effective tools in the fight against climate change and are integral to nature.

I. Main economic indicators

Monetary developments

In February 2024, money supply rose by Afl. 81.2 million to Afl. 5,750.9 million, compared to January 2024, resulting from increases in both net domestic assets (+Afl. 63.2 million) and net foreign¹ assets (+Afl. 18.0 million) (See Chart 1).

Source: Centrale Bank van Aruba

Money, as a component of broad money, grew by Afl. 43.3 million to Afl. 3,472.6 million, due to expansion in demand deposits (+Afl. 40.1 million) and currency in circulation (+Afl. 3.2 million). The growth in demand deposits resulted from increases in deposits denominated in Aruban florin (+Afl. 20.7 million) as well as in deposits denominated in foreign currency (+Afl. 19.4 million). Quasi-money expanded by Afl. 38.0 million to Afl. 2,278.3 million, due to decreases in both time deposits

denominated in Aruban florin (+Afl. 32.9 million) and savings deposits denominated in Aruban florin (+Afl. 5.3 million).

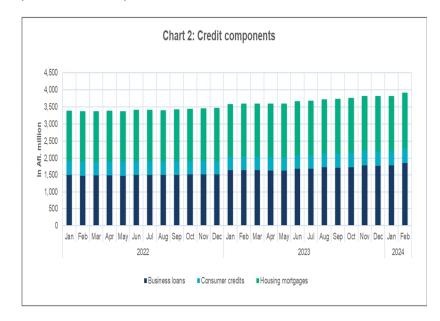

In February 2024, the expansion in net foreign assets of the banking sector was due to net purchases of foreign exchange of Afl. 516.7 million from the public, mostly related to foreign exchange revenue from tourism exports and net transfers from foreign accounts. These were almost completely offset by net sales of foreign exchange of Afl. 498.7 million to the public, mainly associated with direct investment and payments for goods imports (Table 1).

¹ Excluding revaluation differences of gold and foreign exchange holdings.

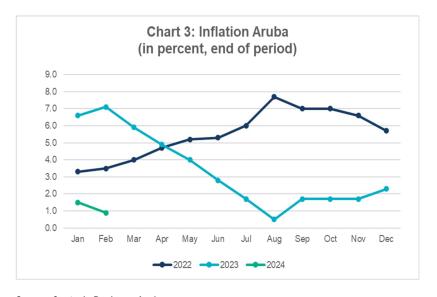

The development in the domestic component of the money supply was caused by a surge in domestic credit (+Afl. 83.7 million) and a drop in non-credit-related balance sheet items (-Afl. 20.5 million). The increase in domestic credit resulted from higher claims of the banking sector on the private sector (+Afl. 84.6 million) and lower net claims of the banking sector on the public sector (-Afl. 0.9 million). The expansion in claims of the banking sector on the private sector (Chart 2) resulted from increases in loans to enterprises (+Afl. 74.8 million), consumer credit (+Afl. 5.7 million), and housing mortgages (+Afl. 4.1 million).

Inflation

The consumer price index (CPI) for February 2024 noted a 0.9 percent rise year-over-year (YOY), compared to a 1.5 percent increase (YOY) for January 2024 (Chart 3).

Source: Centrale Bank van Aruba

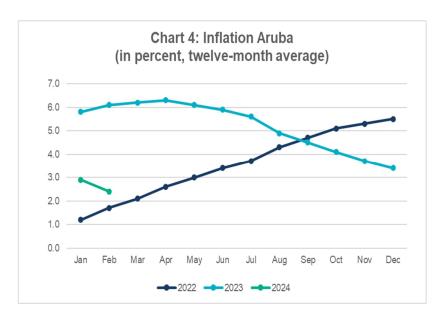

The main contributor to this increase was the "Communication" component. In addition, the components "Miscellaneous Goods and Services," "Food and Non-alcoholic Beverages," "Housing," "Education," "Restaurants and Hotels," and "Health" also noted an uptick. The components "Transport," "Household Operations," "Recreation and Culture," and "Clothing and Footwear" noted decreases, while the component "Beverages and Tobacco Products" remained

unchanged. Furthermore, by excluding the effect of food and energy², the core CPI rose by 1.7 percent (YOY) (Table 2).

Government

Total government revenue amounted to Afl. 111.1 million in February 2024, Afl. 10.0 million less than the same month of the previous year.

The contraction in government revenue resulted from a decrease in nontax revenue (-Afl.17.3 million) and an increase in tax revenue (+Afl. 7.4 million).

The growth in tax revenue was mainly driven by the expansion in income from turnover tax (B.B.O./B.A.V.P.) (+Afl. 5.5 million), profit tax (+Afl. 3.1 million), and hotel room tax (+Afl. 2.1 million). In contrast, income from income tax declined (-Afl. 2.8 million).

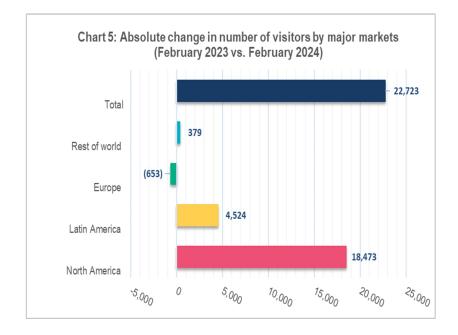

Tourism

The number of stay-over visitors amounted to 122,149 in February 2024, which was 22,723 visitors (+22.9 percent) more than in February 2023.

The North American market and the Latin American market increased by 18,473 visitors (+22.4 percent) and 4,524 visitors (+57.7 percent), respectively. In contrast, the European market fell by 653 visitors (-9.6 percent).

The surge in the North American market mainly resulted from more arrivals from the United States (+16,787 visitors or +22.4 percent). The rise in the arrivals from the Latin American market was primarily due to more arrivals from Peru and Colombia, while the drop in the European market was mostly driven by less arrivals from the Netherlands.

In the month under review, the total number of nights spent in Aruba, as indicated by the visitors, increased by 16.6 percent to 987,105 as compared to the corresponding month for the year 2023. The average intended night stays experienced a decrease from 8.5 nights in February 2023 to 8.1 nights in February 2024. The number of cruise visitors amounted to 128,386 in February 2024 and the number of ship calls was 49.

^{*} The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

^{**} Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

^{***} Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

¹⁾ The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.

²⁾ Tourism credits is compiled from transactions in foreign currency, traveler's checks, and credit cards, as reported by the foreign exchange banks.
