I. Main economic indicators

Monetary developments

In December 2017, money supply expanded by Afl. 88.7 million to Afl. 4,239.9 million, compared to November 2017, resulting from growth in both net foreign assets¹ and domestic assets, of Afl. 71.4 million and Afl. 17.3 million, respectively.

Money, as a component of broad money, rose by Afl. 114.4 million to Afl. 2,421.6 million, because of increases in demand deposits and currency in circulation of Afl. 97.4 million and Afl. 17.0 million, respectively. The growth in demand deposits resulted primarily from an Afl. 59.2 million rise in deposits denominated in Aruban florin, and to a lesser extent by an increase in deposits denominated in foreign currency of Afl. 38.2 million. Quasi-money fell by Afl. 25.7 million to Afl. 1,818.3 million, due mainly to an Afl. 31.7 million decline in time deposits denominated in Aruban florin, which was partly mitigated by an Afl. 5.4 million increase in savings deposits denominated in Aruban florin.

The increase in the net foreign assets of the banking sector resulted from net purchases of foreign exchange of Afl. 252.6 million from the public mainly associated with foreign exchange revenue from tourism activities, net transfers from foreign accounts, other investments, transportation services and direct investments (see Table A). This was largely offset by net sales of foreign exchange of Afl. 181.3 million to the public, mainly related to goods, other services, current transfers and income.

The expansion in the domestic component of the money supply was caused by a surge of Afl. 39.5 million in non-credit related balance sheet items, which was largely offset by an Afl. 22.2 million contraction in domestic credit. The surge in non-credit related balance sheet items was mostly related to a decline in other liabilities and clearing transactions.

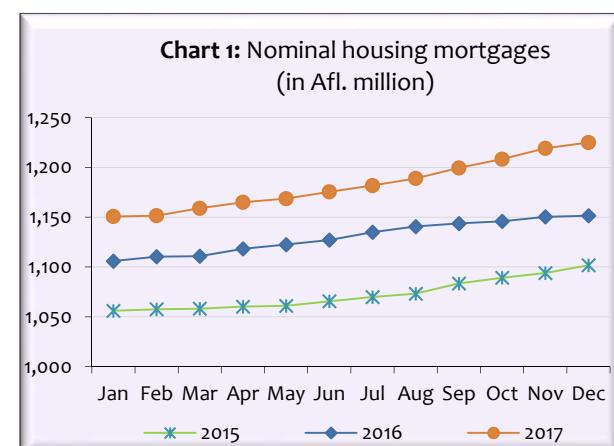

Domestic credit contracted due to the drop in the net claims of the banking sector on the public sector (-Afl. 25.2 million), while claims of the banking sector on the private sector increased (+Afl. 3.0 million).

**Table A. Change in Net Foreign Assets (NFA) December 2017
(in Afl. millions)**

Net purchases of foreign exchange	252.6

NET CHANGE IN NFA (minus (-) denotes a decrease)	71.4

Source: Centrale Bank van Aruba

The decrease in the net claims of the banking sector on the public sector was mainly attributed to an increase in the deposits of the government of Afl. 32.6 million. The upturn in the claims of the banking sector on the private sector was attributed to expansions in housing mortgages (+Afl. 5.8 million) and loans to enterprises (+Afl. 3.3 million). Consumer credit, on the other hand, decreased by Afl. 6.1 million.

¹ Excluding revaluation differences of gold and foreign exchange holdings.

Inflation

The consumer price index (CPI) for December 2017 noted a 0.3 percent decrease year-over-year (YoY) (see Chart 2). The main contributor to this decline was the component “Housing”, which was mainly driven by a fall in electricity. Other components also noting decreases were “Recreation and Culture”, “Household Operation” and “Clothing and Footwear”. Conversely, the components “Transport”, and “Restaurant and Hotels” registered increases. Excluding the effect of food and energy², the core CPI rose by 0.2 percent (YoY) (see Table B). The 12-month average inflation rate remained unchanged at -0.5 percent in December 2017, compared to November 2017 (see Chart 3).

Tourism

In December 2017, the number of stay-over visitors amounted to 105,544, which is 8,502 visitors (+8.8 percent) more than in December 2016 (Chart 4). This growth was mainly due to the expansion in the North American market of 10,228 visitors (+16.6 percent), which was partially counterbalanced by a reduction in the Latin American market of 2,000 visitors (-8.1 percent).

The increase in the North American market was largely due to a rise in arrivals from the United States (+9,302 visitors or +16.7 percent). The decline in the Latin American market was mainly because of a reduction in arrivals from Venezuela (-3,506 visitors or -22.9 percent, partially mitigated by increases in visitors from Colombia (+742 visitors or +18.2 percent), Argentina (+534 visitors or +40.8 percent), and Brazil (+411 visitors or +29.5 percent).

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, grew by 6.3 percent to 844,390, compared to the same month of the previous year. The average intended night stays decreased slightly to 8.0 nights in December 2017, compared to 8.2 nights in December 2016.

² Partly affects the housing and transport components.

The number of cruise visitors decreased by 1,867 passengers or 1.9 percent to 98,775 in December 2017, compared to December 2016. The number of ship calls expanded from 47 in December 2016 to 51 in December 2017.

Source: Aruba Tourism Authority

Government

In December 2017, total government revenue amounted to Afl. 143.1 million, which was Afl. 7.7 million more than the same month of the previous year. This resulted from an increase in tax revenue of Afl. 39.6 million, which was largely offset by a contraction in nontax revenue of Afl. 31.9 million.

The upturn in tax revenue was mainly related to increases in profit tax (+Afl. 34.0 million), land tax (+Afl. 4.2 million), transfer tax (+Afl. 2.7 million), income tax (+Afl. 1.9 million) and receipt from motor vehicle fees (+Afl. 1.1 million). In contrast, decreases were registered in wage tax (-Afl. 4.2 million) and import duties (-Afl. 1.5 million).

	1,668.1	1,744.3	1,916.1	1,818.3	1,818.7	1,816.2	1,916.1	1,866.0	1,844.0	1,818.3		

* The monetary survey consolidates the accounts of the Central Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
