## I. Main economic indicators

### Monetary developments

In July 2017, money supply expanded by Afl. 60.3 million to Afl. 4,194.5 million, compared to June 2017, resulting from an Afl. 81.5 million growth in net domestic assets and an Afl. 21.1 million decline in net foreign assets<sup>1</sup>.

Money, as a component of broad money, increased by Afl. 15.5 million to Afl. 2,333.9 million, as demand deposits noted an Afl. 19.7 million rise, which was partially mitigated by an Afl. 4.2 million reduction in currency in circulation. The upturn in demand deposits resulted from an Afl. 35.3 million expansion in deposits denominated in Aruban florin, which was partly offset by an Afl. 15.7 million contraction in deposits in foreign currency. Quasi-money went up by Afl. 44.8 million to Afl. 1,860.6 million, resulting mostly from an Afl. 48.3 million surge in time deposits denominated in Aruban florin, which was somewhat counterbalanced by an Afl. 4.8 million drop in savings deposits denominated in Aruban florin.

The increase in the domestic component of the money supply was caused by an Afl. 85.3 million rise in domestic credit, while non-credit related balance sheet items registered an Afl. 3.8 million downturn. Domestic credit expanded due to increases in the net claims of the banking sector on the public sector (+Afl. 83.2 million) and in the claims of the banking sector on the private sector (+Afl. 2.0 million).

The increase in the net claims of the banking sector on the public sector was mainly attributed to a fall in the deposits of the government of Afl. 81.2 million. Claims on the private sector went up mainly due to an Afl. 6.2 million upturn in housing mortgages, which was largely mitigated by declines in loans to enterprises and consumer credit of Afl. 3.1 million and Afl. 1.1 million, respectively.

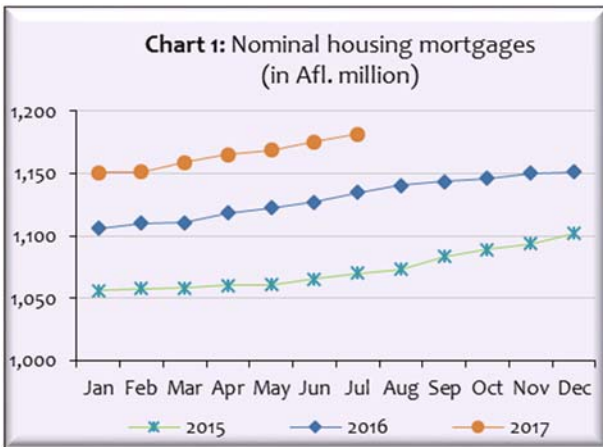

The Afl. 21.1 million reduction in the net foreign assets of the banking sector resulted from net sales of foreign exchange of Afl. 180.8 million to the public, mainly associated with goods, net transfers to foreign accounts, other services, other investment, current transfers, and financial derivatives (see Table A). This was largely offset by net purchases of foreign exchange of Afl. 159.6 million from the public, mainly related to foreign exchange revenue from tourism activities, transportation services, and direct investment.

The drop in the non-credit related balance sheet items resulted primarily from an increase in shareholders' equity, decreases in borrowings and accounts receivable and prepayments, and clearing transactions.

<b>Net purchases of foreign exchange</b>	<b>159.6</b>
Tourism services	150.8
Transportation services	3.3
Direct investment	2.8
Income	1.5
Government services	1.2
<b>Net sales of foreign exchange</b>	<b>-180.8</b>

### Inflation

The consumer price index (CPI) for July 2017 noted a 1.1 percent decrease year-over-year (YoY) (see Chart 2). The main contributor to this decline was the component “Housing”, which was mainly driven by a fall in electricity. Other components also noting decreases were “Transport”, “Recreation and culture”, “Household operation”, and “Communication”. In contrast, the components “Food and Non-Alcoholic Beverages”, “Education”, and “Restaurant and Hotels” registered increases. Excluding the effect of food and energy<sup>2</sup>, the growth in the core CPI was 0.1 percent (YoY) (see Table B). The 12-month average inflation rate remained unchanged at -0.4 percent in July 2017, compared to June 2017 (see Chart 3).

**Table B. Components of Inflation**

Inflation components	End-month inflation		12-month average inflation

### Tourism

In July 2017, the number of stay-over visitors amounted to 102,272, which is 2,854 visitors (+2.9 percent) more than in July 2016 (Chart 4). The growth in the North American market of 5,874 visitors (+9.2 percent) was primarily responsible for this expansion. In contrast, the Latin American market registered a decrease of 8.0 percent (-1,826 visitors).

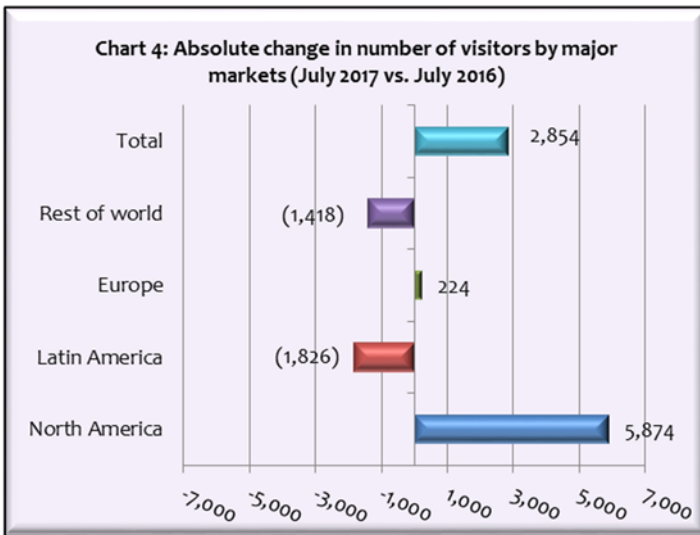

The increase in the North American market was primarily due to a rise in arrivals from the United States (+5,462 visitors or +8.9 percent). The decrease in the Latin American market was mainly caused by a drop in visitors from Venezuela (-4,059 visitors or -29.1 percent), which was partly mitigated by increases in the Argentinean (+1,228 visitors or +69.0 percent),

<sup>2</sup> Partly affects the housing and transport components.

Colombian (+610 visitors or +22.7 percent), Brazilian (+277 visitors or +20.5 percent), and the Peruvian (+262 visitors or +56.0 percent) markets.

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, grew by 2.6 percent to 772,562, compared to the same month of the previous year. The average intended night stays remained unchanged at 7.6 nights in July 2017, compared to July 2016.

The number of cruise visitors registered a rise of 12,967 passengers or 68.5 percent to 31,888 in July 2017, compared to July 2016. The number of ship calls expanded from 8 in July 2016 to 14 in July 2017.

### Government

In July 2017, total government revenue amounted to Afl. 77.9 million, which was Afl. 27.7 million less than the same month of the previous year. This downturn resulted from declines in both tax revenue (-Afl. 20.6 million) and nontax revenue (-Afl. 7.3 million).

The reduction in tax revenue resulted mainly from decreases in profit tax (-Afl. 23.5 million) and land tax (-Afl. 4.9 million), which were slightly offset by expansions in revenue from income tax (+Afl. 3.3 million), foreign exchange tax (+Afl. 2.4 million), and wage tax (+Afl. 1.1 million).

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
