I. Main economic indicators

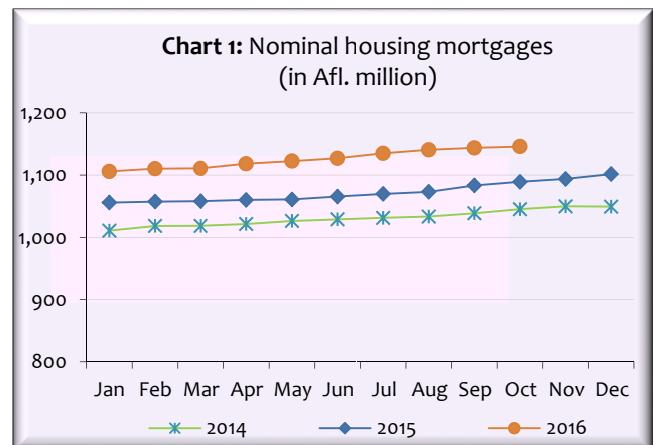

Monetary developments

In October 2016, money supply registered a rise of Afl. 19.1 million to Afl. 4,063.8 million, compared to the previous month, resulting from increases in both the net domestic assets and net foreign assets of Afl. 16.0 million and Afl. 3.1 million, respectively.

Money, as a component of broad money, increased by Afl. 32.0 million to Afl. 2,245.1 million, as demand deposits registered an expansion of Afl. 33.5 million, while currency in circulation marked a decrease of Afl. 1.4 million. The rise in demand deposits resulted from growths in deposits denominated in both Aruban florin and foreign currency of Afl. 21.6 million and Afl. 11.9 million, respectively. Quasi-money fell by Afl. 12.9 million to Afl. 1,818.7 million, as time deposits and savings deposits, both denominated in Aruban florin, recorded decreases of Afl. 9.1 million and Afl. 3.3 million, respectively.

The growth in the domestic component of the money supply was the result of an Afl. 17.3 million increase in non-credit related balance sheet items and an Afl. 1.3 million decline in domestic credit. The rise in the non-credit related balance sheet items resulted mostly from expansions in ‘shareholders equity’, ‘premises and equipment’ and ‘accounts receivables and prepayments’ and a decrease in ‘borrowings’, as well as clearing transactions.

Domestic credit declined as a result of an Afl. 6.6 million drop in the claims of the banking sector on the private sector and an Afl. 5.3 million increase in the net claims on the public sector. The decrease in claims of the banking sector on the private sector was due to a decrease in consumer credit (-Afl. 10.2 million), which was largely offset by increases in housing mortgages (+Afl. 2.2 million) and loans to enterprises (+Afl. 1.4 million) (Chart 1). The upsurge in net claims on the public sector resulted mainly from the drawing down of government deposits of Afl. 6.0 million. In contrast, the development funds increased by Afl. 1.9 million.

Source: Centrale Bank van Aruba

The growth in the net foreign assets of the banking sector resulted from net purchases of foreign exchange of Afl. 197.8 million from the public, mainly associated with tourism, net transfers from foreign accounts and direct investment, which were partly counter-balanced by net sales of foreign exchange of Afl. 194.7 million to the public, largely related to net payments for goods, other services and income (Table A).

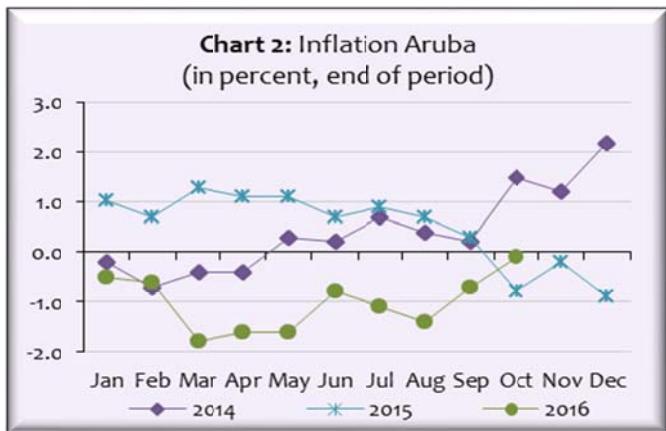

Table A. Change in Net Foreign Assets (NFA) October 2016 (in Afl. millions)	
Net purchases of foreign exchange	197.8
Tourism services	129.5
Net transfers from foreign accounts	38.4
Direct investment	25.3

Inflation

The consumer price index (CPI) for October 2016 noted a 0.1 percent decrease year-over-year (YoY)

(Chart 2). The main contributor to this decrease was the component “Housing”, which was largely driven by a fall in electricity costs. In contrast, the components “Transport”, “Food and Non-Alcoholic Beverages”, and “Clothing and Footwear” registered an increase. Excluding the effect of food and energy¹, the growth in the core CPI was 0.7 percent (YoY) (Table B). The 12-month average inflation rate remained unchanged at -1.0 percent in October 2016, compared to September 2016 (Chart 3).

Tourism

In October 2016, the number of stay-over visitors totaled 76,491, which was 29.8 percent (-32,533 visitors) less than in October 2015 (Chart 4). The decreases in the Latin American market of 64.7 percent (-30,862 visitors) and the North American market of 3.2 percent (-1,598 visitors) contributed to the contraction in stay-over visitors. On the other hand, the European market registered an increase of 14.3 percent (+1,037 visitors).

The decrease in the Latin American market was predominantly caused by a drop in visitors from Venezuela (-30,975 visitors or -76.7 percent).

The decline in the North American market resulted mainly from a 3.6 percent decrease in arrivals from the United States (-1,701 visitors).

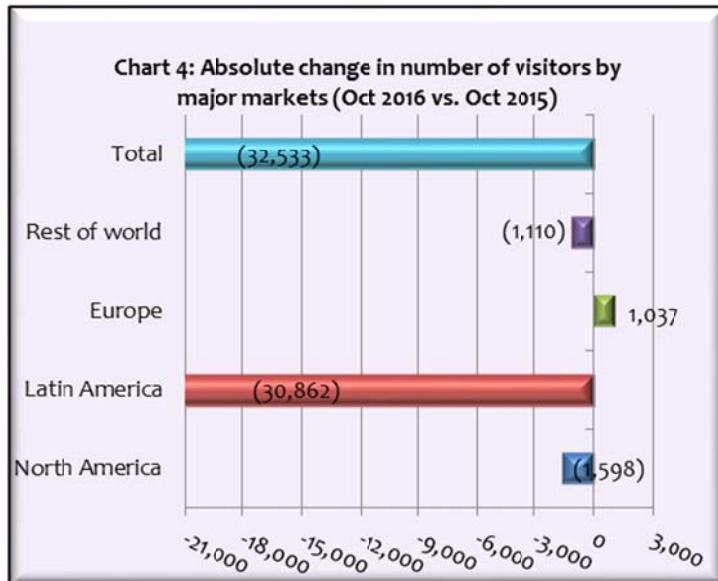

The growth in the European market resulted largely from a 52.3 percent increase in arrivals from the United Kingdom (+753 visitors).

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, fell by 16.3 percent to 556,985 compared to the same month of the previous year. The average intended night stays increased from 6.1 nights in October 2015 to 7.3 nights in October 2016.

¹ Partly affects the housing and transport components.

The number of cruise visitors registered a downturn of 12,604 or 24.7 percent to 38,349 in October 2016, compared to October 2015. The number of ship calls fell, from 20 in October 2015 to 17 in October 2016.

90.91 per Afl. 100 nominal, yielding 0.38 percent on a yearly basis.

Source: Aruba Tourism Authority

Government revenue

In October 2016, total government revenue amounted to Afl. 95.7 million, which was Afl. 11.5 million higher than in the same month of the previous year. This increase was caused by a rise of Afl. 14.1 million in tax revenue, which was somewhat offset by a decrease of Afl. 2.6 million in non-tax revenue.

The expansion in tax revenue was largely related to growth in excises on gasoline (+Afl. 16.8 million), wage tax (+Afl. 1.6 million), excises on beer (+Afl. 0.8 million) and turnover tax (+Afl. 0.5 million). On the other hand, decreases were mostly registered in profit tax (-Afl. 3.6 million), import duties (-Afl. 0.9 million) and land tax (-Afl. 0.8 million).

II. Operations of the CBA

On November 25, 2016, Afl. 45 million in three-month treasury bills were issued at an average price of Afl. 99.90 per Afl. 100 nominal, yielding 0.39 percent on a yearly basis.

On December 9, 2016, Afl. 20 million in three-month treasury bills were issued at an average price of Afl.

	1,588.9	1,578.6	1,668.1	1,744.3	1,766.7	1,766.7	1,773.5	1,877.5	1,831.6	1,818.7		

* The monetary survey consolidates the accounts of the Central Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
