I. Main economic indicators

Monetary developments

In June 2016, money supply registered an upturn of Afl. 126.0 million to Afl. 4,071.2 million, compared to the previous month, resulting from growth in both net domestic assets and net foreign assets¹ of Afl. 109.3 million and Afl. 16.7 million, respectively.

Quasi-money expanded by Afl. 104.3 million to Afl. 1,915.1 million, as time deposits and savings deposits denominated in Aruban florin grew by Afl. 93.3 million and Afl. 10.9 million, respectively. Money, as a component of broad money, increased by Afl. 21.6 million to Afl. 2,156.1 million, as demand deposits and currency in circulation noted upturns of Afl. 17.3 million and Afl. 4.3 million, respectively. The rise in demand deposits resulted from an Afl. 21.9 million expansion in deposits denominated in Aruban florin, which was partly offset by an Afl. 4.6 million reduction in deposits denominated in foreign currency.

The growth in the domestic component of the money supply was attributed to an Afl. 121.8 million surge in domestic credit, which was partially counterbalanced by an Afl. 12.5 million contraction in non-credit related balance sheet items.

Domestic credit increased as the net claims of the banking sector on the public sector and the claims on the private sector recorded gains of Afl. 112.1 million and Afl. 9.7 million, respectively. The surge in net claims on the public sector resulted mainly from the drawing down of government deposits and Development Fund by Afl. 125.0 million and Afl. 10.0 million, respectively. An Afl. 22.9 million decrease in gross claims marginally mitigated the abovementioned surge. The rise in claims of the banking sector on the private sector was mostly due to increases in loans to enterprises (+Afl. 6.6 million) and housing mortgages (+Afl. 4.7 million) (Chart 1), which were partly offset by a decrease in consumer credit (-Afl. 1.8 million). The decline in non-credit

related balance sheet items resulted from increases in other liabilities, shareholders' equity, premises and equipment, accounts receivable and prepayments, as well as clearing transactions.

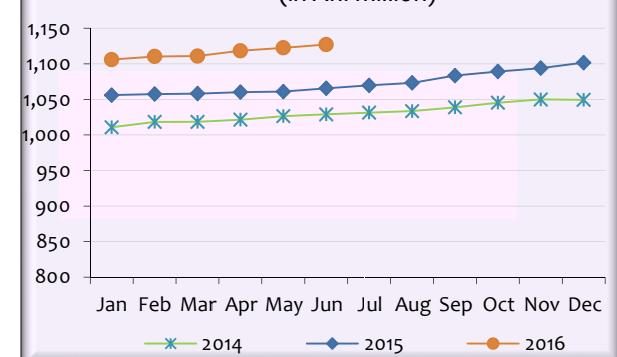

The expansion in the net foreign assets of the banking sector was driven by net purchases of foreign exchange of Afl. 180.0 million from the public, mainly associated with tourism, net transfers from foreign accounts, direct investment, and transportation. The aforementioned purchases were partially counterbalanced by the net sales of foreign exchange of Afl. 163.3 million to the public, largely related to net payments for goods, other services, other investment, financial derivatives, current transfers, income, and government services (Table A).

**Table A. Change in Net Foreign Assets (NFA) June 2016
(in Afl. millions)**

Net purchases of foreign exchange	180.0
Tourism services	132.4
Net transfers from foreign accounts	31.8

Inflation

The consumer price index (CPI) for June 2016 noted a 0.8 percent decrease year-over-year (YoY) (Chart 2). The contributors to this decrease were the component “Housing”, which was largely driven by a fall in electricity costs, and the component “Transport”, primarily due to a decline in gasoline prices. In contrast, the components “Clothing and Footwear”, “Food and Non-alcoholic Beverages”, “Communication”, “Recreation and Culture”, “Restaurants and Hotels”, as well as “Miscellaneous Goods and Services” registered an increase. Excluding the effect of food and energy², the growth in the core CPI was 0.7 percent (YoY) (Table B). The 12-month average inflation rate was -0.6 percent in June 2016, compared to -0.5 percent in May 2016 (Chart 3).

Tourism

In June 2016, the number of stay-over visitors totaled 86,697, which is 0.9 percent (-750 visitors) less than in June 2015 (Chart 4). The contraction resulted predominantly from a downturn in the Latin American market of 18.7 percent (-4,735 visitors), which was partially counterbalanced by a 6.0 percent (+3,168 visitors) increase in the North American market.

The decrease in the Latin American market was principally caused by a drop in visitors from Venezuela (-6,980 visitors or -36.7 percent).

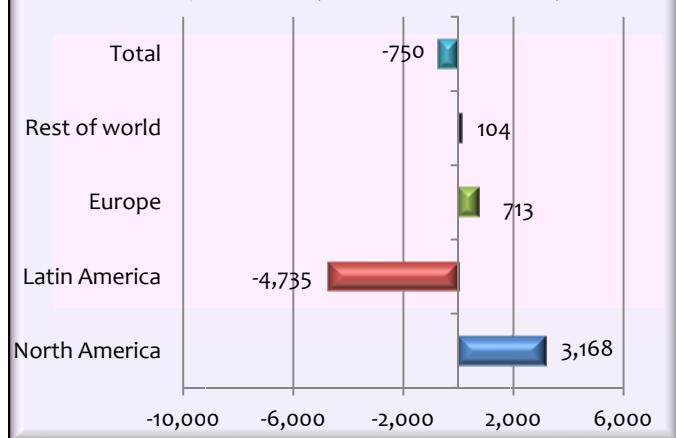

The expansion in the North American market resulted mainly from a 6.4 percent rise in arrivals from the United States (+3,275 visitors).

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, grew by 3.0 percent to 612,519, compared to the same month of the previous year. The average intended night stays increased from 6.8 nights in June 2015, to 7.1 nights in June 2016.

The number of cruise visitors registered an upturn of 3,209 or 14.4 percent to 25,452 in June 2016, compared to June 2015. The number of ship calls noted a decline, from 9 in June 2015 to 7 in June 2016.

² Partly affects the housing and transport components.

Chart 4: Absolute change in number of visitors by major markets (June 2016 vs. June 2015)

Government

Please note that monthly figures on government revenue for June 2016 were not available at the time of publication of this bulletin.

B) Quasi-money	1,588.9	1,578.6	1,668.1	1,744.3	1,749.2	1,731.4	1,717.2	1,775.9	1,810.8	1,915.1

* The monetary survey consolidates the accounts of the Central Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-1) of the CBA.
