I. Main economic indicators

Monetary developments

In March 2016, money supply increased by Afl. 54.9 million to Afl. 3,899.7 million, compared to the previous month, resulting from an Afl. 81.6 million expansion in net domestic assets and an Afl. 26.8 million contraction in net foreign assets¹.

Money, as a component of broad money, declined by Afl. 5.1 million to Afl. 2,133.7 million, as demand deposits and currency in circulation registered decreases of Afl. 4.2 million and Afl. 0.8 million, respectively. The decline in demand deposits resulted from an Afl. 19.7 million decrease in deposits in foreign currency and an Afl. 15.5 million increase in deposits denominated in Aruban florin. Quasi-money rose by Afl. 59.9 million to Afl. 1,766.0 million, as savings deposits denominated in Aruban florin rose by Afl. 46.2 million, due to a reclassification from demand deposits to savings accounts, and, time deposits denominated in Aruban florin recorded a growth of Afl. 13.9 million.

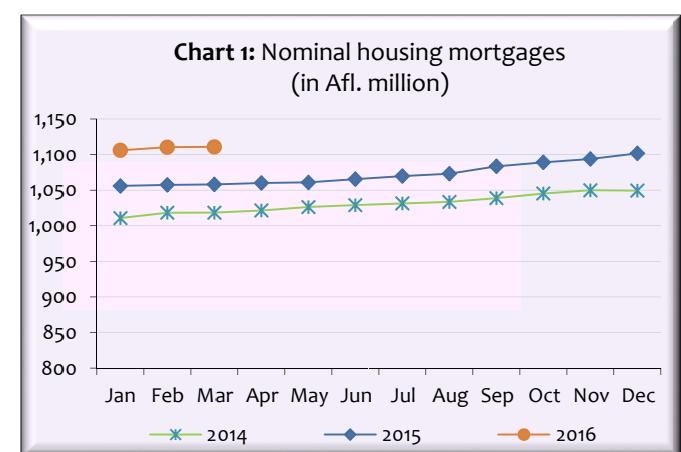

The growth in the domestic component of the money supply was brought about by increases in both domestic credit and non-credit related balance sheet items of Afl. 54.2 million and Afl. 27.4 million, respectively. The latter resulted from clearing transactions, a decrease in other liabilities, and an increase in accounts receivables and prepayments.

Domestic credit grew, mainly as the result of an Afl. 53.9 million increase in the net claims of the banking sector on the public sector. This was mostly due to an Afl. 56.1 million decrease in government deposits. Furthermore, claims on the private sector increased slightly by Afl. 0.3 million resulting from increases in loans to enterprises (+Afl. 4.6 million) and housing mortgages (+Afl. 0.5 million), which were largely offset by an Afl. 4.8 million decrease in consumer credit (Chart 1).

The decrease in the net foreign assets of the banking sector was driven by net sales of foreign exchange of Afl. 227.8 million to the public largely related to net payments for goods, income, other services, current transfers, financial derivatives, other investments, and net transfers to notified foreign accounts of resident companies. These sales were offset to a large extent by the net purchases of foreign exchange of Afl. 201.0 million from the public mainly associated with tourism (Table A).

Table A. Change in Net Foreign Assets (NFA) March 2016	
	(in Afl. millions)
Net purchases of foreign exchange	201.0
Tourism services	189.9
Transportation services	7.2
Direct investment	3.3
Portfolio investment	0.3
Items not yet classified	0.3
Net sales of foreign exchange	-227.8
Goods	-119.3
Net transfers to foreign accounts	-30.9
Income	-28.0
Other services	-19.5
Other investment	-13.2
Financial derivatives	-9.0
Current transfers	-6.7
Government services	-1.1
Capital account transactions	-0.1
NET CHANGE IN NFA (minus (-) denotes a decrease)	-26.8

¹ Excluding revaluation differences of gold and foreign exchange holdings.

Inflation

The consumer price index (CPI) for March 2016 noted a 1.8 percent decrease year-over-year (YoY), (Chart 2). The main contributors to this decrease were the component “Housing”, which was mainly driven by a fall in electricity costs, and the component “Transport”, largely due to a decline in gasoline prices. Additionally, “Food and Non-Alcoholic Beverages” and “Recreation and Culture” contributed to the decrease. In contrast, the components “Restaurant and Hotels” and “Communication” registered an increase. Excluding the effect of food and energy², the growth in the core CPI was 0.2 percent (YoY) (Table B). The 12-month average inflation rate was zero percent in March 2016, compared to a growth of 0.2 percent in February 2016 (Chart 3).

Tourism

In March 2016, the number of stay-over visitors amounted to 109,998 which is 6.3 percent (+6,492 visitors) more than in March 2015 (Chart 4). The expansion in both the Latin American market of 12.2 percent (+3,779 visitors) and the North American market of 2.4 percent (+1,545 visitors) contributed to this growth.

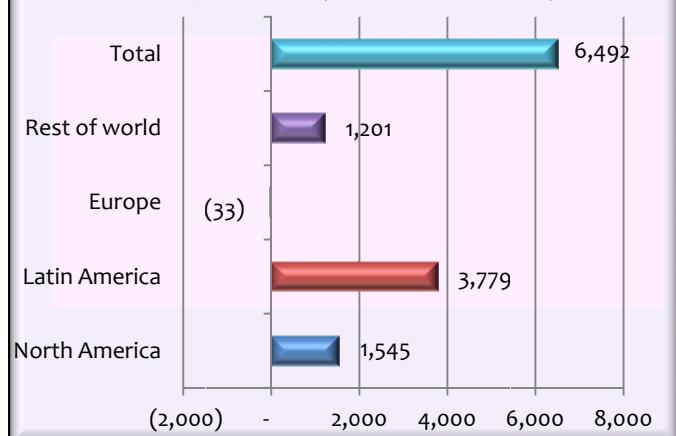

The expansion in the Latin American market was mostly associated with a growth of 2,886 visitors (YoY) from Venezuela. The rise in the North American market was largely the result of an increase of 2,491 visitors (YoY) from the United States.

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, grew by 1.6 percent to 724,458, compared to the same month of the previous year. The average intended night stays declined from 6.9 nights in March 2015 to 6.6 nights in March 2016.

The number of cruise visitors rose by 35,631 or 58.3 percent to 96,736 in March 2016, compared to March 2015. The number of ship calls increased from 34 in March 2015 to 48 in March 2016.

² Partly affects the housing and transport components.

Chart 4: Absolute change in number of visitors by major markets (Mar 2016 vs. Mar 2015)

Government

Please note that figures on government revenue for March 2016 were not yet available at the time of publication of this bulletin.

B) Quasi-money	1,821.4	1,713.4	1,793.0	2,060.6	1,753.0	1,802.9	1,813.4
	1,588.9	1,578.6	1,668.1	1,744.3	1,717.5	1,722.5	1,730.5

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-1) of the CBA.
