I. Main economic indicators

Monetary developments

In October 2015, money supply decreased by Afl. 11.8 million to Afl. 3,703.3 million, compared to the previous month, resulting from an Afl. 33.9 million contraction in net domestic assets, which was largely offset by an Afl. 22.1 million increase in net foreign assets¹.

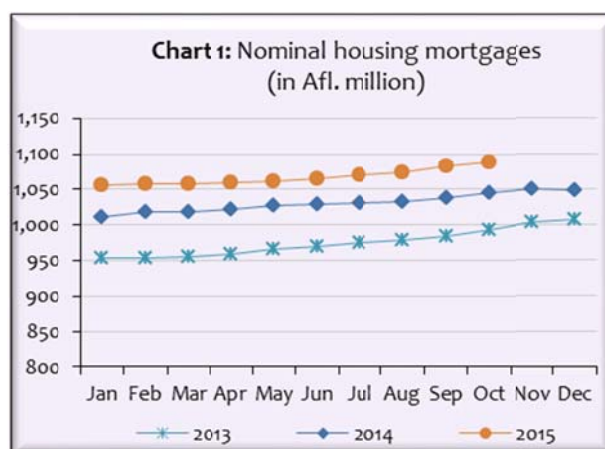

Money, as a component of broad money, declined by Afl. 18.6 million to Afl. 1,929.7 million, as demand deposits registered a decrease of Afl. 20.0 million, while currency in circulation marked an increase of Afl. 1.4 million. The decline in demand deposits was the consequence of decreases in deposits denominated in Aruban florin of Afl. 13.5 million and deposits denominated in foreign currency of Afl. 6.4 million. Quasi-money expanded by Afl. 6.8 million to Afl. 1,773.5 million, as time deposits and savings deposits, both denominated in Aruban florin, recorded growths of Afl. 5.7 million and Afl. 1.1 million, respectively.

The decrease in the domestic component of the money supply was caused by decreases in non-credit related balance sheet items of Afl. 21.4 million and domestic credit of Afl. 12.5 million. The decline in non-credit related balance sheet items resulted from an increase in shareholders' equity, a decrease in accounts receivable, and clearing transactions.

Domestic credit decreased due to a decline in the net claims of the banking sector on the public sector of Afl. 16.5 million and an increase in claims of the banking sector on the private sector of Afl. 3.9 million. The decrease in the net claims on the public sector was mainly due to an Afl. 30.3 million increase

in government deposits. The growth in claims on the private sector resulted from expansions in housing mortgages of Afl. 5.7 million (Chart. 1) and consumer credit of Afl. 1.8 million, which were partly counterbalanced by an Afl. 3.6 million contraction in loans to enterprises.

The increase in the net foreign assets was associated with the net purchases of foreign exchange by the commercial banks from the public related to tourism receipts and portfolio investment. These purchases were partly mitigated by net sales of foreign exchange by the commercial banks to the public related to the import of goods, other services, income, current transfers and direct investment.

Inflation

The consumer price index (CPI) for October 2015 noted a 0.8 percent decrease year-over-year (YoY), (Chart 2). The main contributor to this decrease was the component "Transport", which was mainly driven by a fall in gasoline prices, and to a lesser extent, by the component "Clothing and Footwear". In contrast, the components "Housing", "Communication", "Recreation and Culture" and "Restaurant and Hotels" registered an increase.

¹ Excluding revaluation differences of gold and foreign exchange holdings.

Excluding the effect of food and energy², the growth in the core CPI was 0.8 percent (YoY) (Table A). The 12-month average inflation rate grew by 0.9 percent in October 2015, compared to 1.1 percent in September 2015 (Chart 3).

Tourism

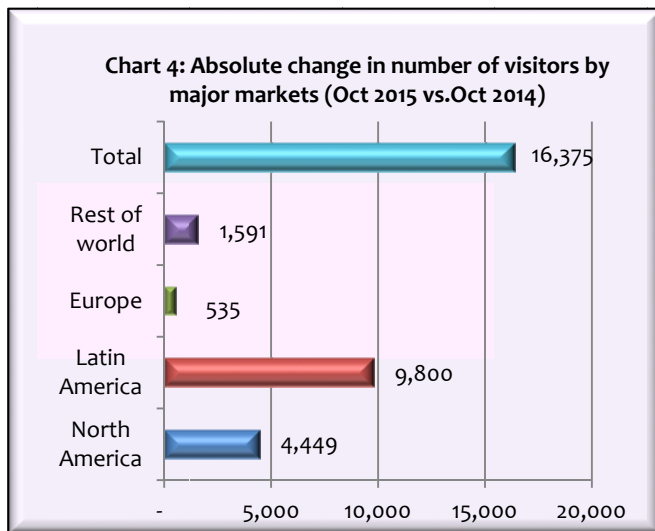

In October 2015, the number of stay-over visitors amounted to 109,024, which is 17.7 percent (+16,375 visitors) more than in October 2014 (Chart 4). The expansion in both the Latin American market (25.9 percent) and the North American market (9.9 percent) led to this growth.

The surge in the Latin American market resulted mainly from a growth of 10,378 visitors (YoY) from Venezuela. The strengthening of the North American market was driven by an increase of 4,272 visitors (YoY) from the United States.

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, grew by 7.6 percent to 665,723, compared to the same month of the previous year. The average intended night stays dropped from 6.7 nights in October 2014 to 6.1 nights in October 2015.

The number of cruise visitors decreased by 178 or 0.3 percent to 50,953 in October 2015, compared to October 2014. The number of ship calls in October 2015 decreased, from 26 in October 2014 to 20 in October 2015.

² Partly affects the housing and transport components.

II. Operations of the CBA

On November 27, 2015, Afl. 45 million in three-month treasury bills were issued at an average price of Afl. 99.84 per Afl. 100 nominal, yielding 0.62 percent on a yearly basis.

On December 4, 2015, Afl. 8 million in six-month cash loan certificates were issued at an average price of Afl. 99.52 per Afl. 100 nominal, yielding 0.97 percent on a yearly basis.

On December 11, 2015, Afl. 20 million in three-month treasury bills were issued at an average price of Afl. 99.85 per Afl. 100 nominal, yielding 0.59 percent on a yearly basis.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
