I. Main economic indicators

Monetary developments

In August 2015, money supply increased by Afl. 104.8 million to Afl. 3,706.1 million, compared to the previous month, resulting from an Afl. 133.6 million expansion in net foreign assets¹ and an Afl. 28.8 million contraction in net domestic assets.

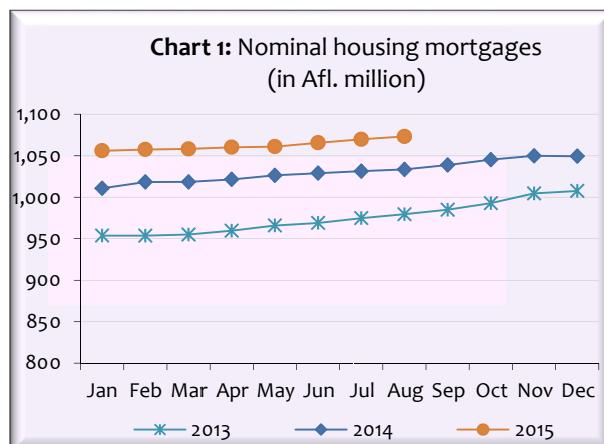

Money, as a component of broad money, rose by Afl. 65.6 million to Afl. 1,945.4 million, as demand deposits and currency in circulation registered increases of Afl. 63.2 million and Afl. 2.4 million, respectively. The growth in demand deposits was the consequence of an Afl. 69.3 million increase in deposits denominated in Aruban florin, which was slightly offset by an Afl. 6.1 million drop in deposits denominated in foreign currency. Quasi-money grew by Afl. 39.2 million to Afl. 1,760.7 million, as time deposits denominated in Aruban florin recorded a growth of Afl. 38.0 million.

The growth in the net foreign assets was associated with the net purchase of foreign exchange by the commercial banks from the public related to tourism receipts, and the government's issuance of external debt in the amount of Afl. 152 million. These purchases were partly mitigated by net sales of foreign exchange by the commercial banks to the public, related to net payments for goods, other services, income, current transfers, as well as net transfers to notified foreign accounts of resident companies.

The contraction in the domestic component of the money supply was caused by reductions in domestic credit and in non-credit related balance sheet items of Afl. 25.7 million and Afl. 3.0 million, respectively.

Domestic credit contracted due to decreases in net claims of the banking sector on the public sector and claims on the private sector of, respectively, Afl. 22.9 million and Afl. 2.9 million. The reduction in the net

claims on the public sector was mainly due to an Afl. 24.5 million reduction in government deposits. The decrease in claims on the private sector resulted from an Afl. 10.4 million contraction in loans to enterprises, which was largely offset by expansions in consumer credit and housing mortgages (Chart 1) of Afl. 4.1 million and Afl. 3.4 million, respectively. The contraction in non-credit related balance sheet items resulted from increases in shareholders' equity and other liabilities, which were largely offset by clearing transactions.

Inflation

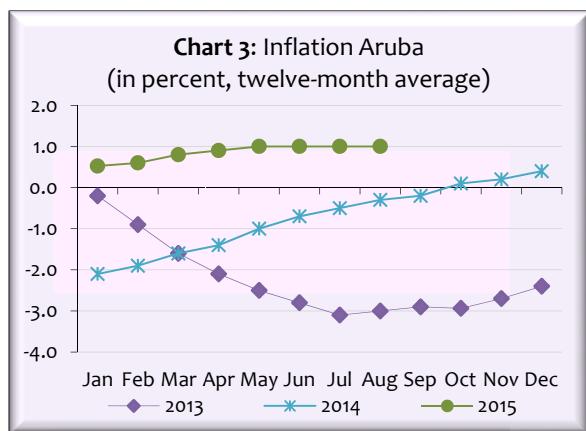

The consumer price index (CPI) for August 2015 noted a 0.7 percent upturn year-over-year (YoY), (Chart 2). The main contributor to this increase was the component "Housing", which was mostly the result of a rise in the sub-category "Electricity, gas and other fuels" of the category housing, due to the higher energy tariffs as of October 2014. Additionally, "Food and Non-Alcoholic Beverages" and "Communication" contributed to the increase. In contrast, the component "Transport" registered a decrease, mainly driven by a decline in gasoline prices. Excluding the effect of food and energy², the core CPI grew by 0.5 percent (YoY) (Table A). The 12-month average inflation rate remained unchanged at 1.0 percent in August 2015, compared to July 2015 (Chart 3).

¹ Excluding revaluation differences of gold and foreign exchange holdings.

² Partly affects the housing and transport components.

Tourism

In August 2015, the number of stay-over visitors totaled 111,471 which is 9.2 percent (+9,423 visitors) more than in August 2014 (Chart 4). The expansion in both the North American market (11.0 percent) and the Latin American market (6.7 percent) drove this growth.

An increase of 5,307 visitors (+11.0 percent) in arrivals from the United States was the main cause in the strengthening of the North American market. The surge in the Latin American market resulted mainly from a growth of 4,222 visitors (+13.0 percent) from Venezuela.

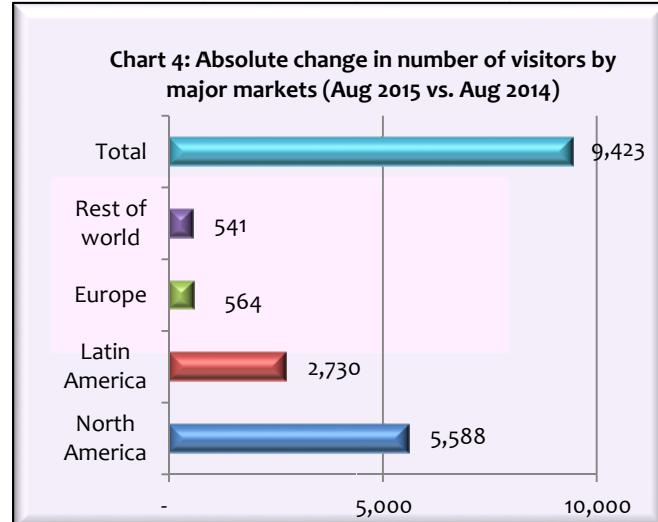

In the month under review, total number of nights spent in Aruba, as indicated by the visitors upon arrival, grew by 5.6 percent to 752,859, compared to the same month of the previous year. The average intended night stays dropped from 7.0 nights in August 2014 to 6.8 nights in August 2015.

The number of cruise visitors decreased by 7,754 or 25.0 percent to 23,282 in August 2015 (YoY). The number of ship calls in August 2015 was 10, down from 14 in August 2014.

Table A. Components of Inflation

Government revenue

In August 2015, tax revenue fell by Afl. 1.4 million to Afl. 70.2 million (YoY). The drop in tax revenue resulted from a reduction in income from profit tax (Afl. 7.6 million), partially offset by increases in revenues from, amongst others, land tax (Afl. 3.8 million), import duties (Afl. 0.8 million), and foreign exchange tax (Afl. 0.8 million).

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
