## I. Main economic indicators

### Monetary developments

In May 2015, money supply increased by Afl. 5.3 million to Afl. 3,572.8 million, caused by an expansion of Afl. 22.0 million in net foreign assets<sup>1</sup>. An Afl. 16.7 million contraction in net domestic assets largely mitigated this increase.

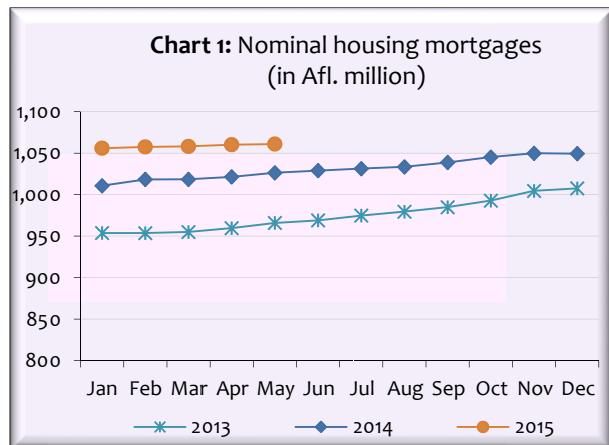

Money, as a component of broad money, rose by Afl. 23.1 million to Afl. 1,841.4 million, as demand deposits registered an increase of Afl. 25.5 million, while currency in circulation declined by Afl. 2.5 million. The expansion in demand deposits was the consequence of an Afl. 34.5 million surge in deposits denominated in Aruban florin, slightly offset by an Afl. 8.8 million reduction in deposits denominated in foreign currency. Quasi-money, on the other hand, fell by Afl. 17.8 million to Afl. 1,731.4 million, as time deposits and savings deposits both denominated in Aruban florin recorded declines of, respectively, Afl. 15.0 million and Afl. 3.4 million.

Net purchases of foreign exchange by the commercial banks from the public, mainly related to tourism, portfolio investment and direct investment, contributed mostly to the growth in the net foreign assets. These purchases were partially mitigated by net sales of foreign exchange by the commercial banks to the public, associated with payments for goods, income and current transfers.

The domestic component of money supply shrank largely because of an Afl. 16.6 million decrease in domestic credit. Domestic credit went down as both net claims on public sector and claims on private

sector registered decreases of, respectively, Afl. 8.6 million and Afl. 8.0 million.

The net claims on the public sector contracted as government deposits and development funds grew by Afl. 8.9 million and Afl. 1.2 million, respectively. An Afl. 1.5 million increase in gross claims slightly offset the aforementioned rises. The contraction of Afl. 8.2 million in loans to enterprises contributed mostly to the decline in claims on the private sector. Housing mortgages grew slightly by Afl. 0.8 million (Chart 1), while consumer credit decreased by Afl. 0.8 million.

### Inflation

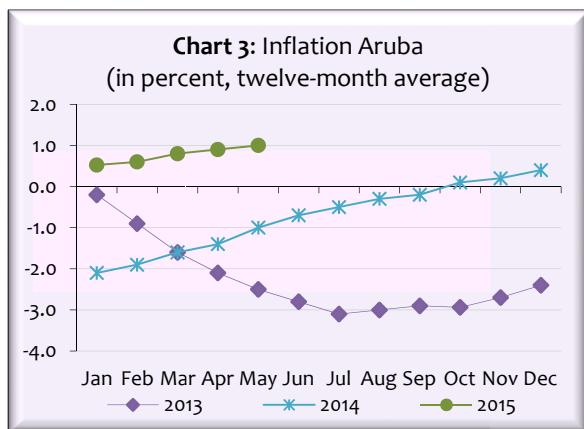

The consumer price index (CPI) for May 2015 noted a 1.1 percent increase, compared to May 2014 (Chart 2). The component “Housing”, registering a 1.4 percent hike, was the largest contributor to this increase, owing mostly to a rise in the category “Electricity, gas and other fuels” (+1.0 percent). The latter was due to the raise in the energy tariffs in October 2014. Excluding the effect of food and energy<sup>2</sup>, the core CPI grew by 1.3 percent, compared to May 2014 (Table A). The 12-month average inflation rate went up by 1.0 percent in May 2015, up from 0.9 percent in April 2015 (Chart 3).

<sup>1</sup> Excluding revaluation differences of gold and foreign exchange holdings.

<sup>2</sup> Partly affects the housing and transport components.

## Tourism

In May 2015, the number of stay-over visitors totaled 87,691, which is 12.3 percent (+9,604 visitors) more than in May 2014 (Chart 4). The expansion in the Latin American market of 34.0 percent (+6,440 visitors) was mainly responsible for this growth. In addition, the North American market went up by 4.9 percent (+2,490 visitors).

The surge in the Latin American market resulted mainly from a 54.2 percent (+6,730 visitors) expansion in the number of visitors from Venezuela. A drop in the number of visitors from Colombia, Brazil, and Argentina of, respectively, 17.0 percent (-307 visitors), 15.1 percent (-241 visitors) and 11.7 percent (-122 visitors) partly mitigated this increase. The gains in the North American market resulted from a 5.3 percent (+2,555 visitors) increase in arrivals from the United States, while arrivals from Canada declined by 2.8 percent (-65 visitors).

In the month under review, the total intended number of nights spent in Aruba grew by 13.1 percent to 603,850, compared to the same month of the previous year. The average intended night stays picked up slightly from 6.8 nights in May 2014 to 6.9 nights in May 2015.

The number of cruise visitors decreased by 8,333 or 24.0 percent to 26,447 in May 2015, compared to May 2014. The number of ship calls remained unchanged at 13 in May 2015, compared to the same month of the previous year.

## II. Operations of the CBA

- On May 29, 2015, Afl. 45 million in three-month treasury bills were issued at an average price of Afl. 99.80 per Afl. 100 nominal, yielding 0.79 percent on a yearly basis.
- On June 4, 2015, Afl. 8 million in 6-month cash loan certificates were issued at an average price of Afl. 99.52 per Afl. 100 nominal, yielding 0.97 percent on a yearly basis.
- On June 12, 2015, Afl. 20 million in three-month treasury bills were issued at an average price of Afl. 99.81 per Afl. 100 nominal, yielding 0.75 percent on a yearly basis.

B) Quasi-money	1,556.1	1,821.4	1,713.4	1,793.0	1,790.2	1,858.9	1,789.1
	1,603.9	1,588.9	1,578.6	1,668.1	1,576.7	1,570.2	1,582.7

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
