I. Main economic indicators

Monetary developments

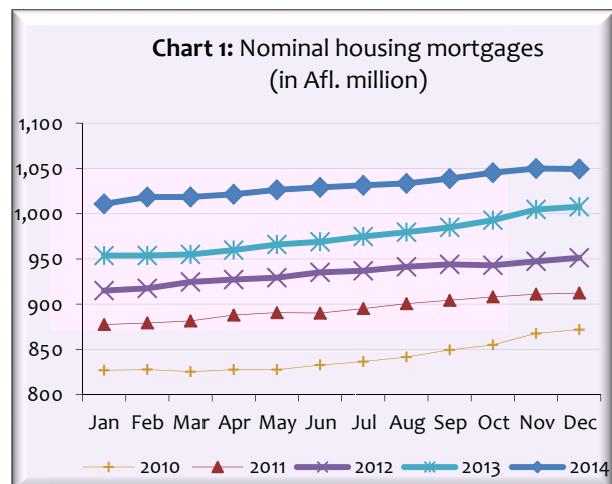

During the month of December 2014, money supply rose by Afl. 23.7 million to Afl. 3,476.3 million, resulting from increases in net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) and in net domestic assets of, respectively, Afl. 19.1 million and Afl. 4.7 million.

The Afl. 19.1 million expansion in net foreign assets was mainly the result of the receipt of Afl. 26.3 million (USD 14.7 million) related to the issuance of government bonds in December 2014. In addition, the deficit on the current account was partially offset by a net inflow of foreign funds associated with other financial transactions, including a net transfer from foreign bank accounts of resident companies.

The rise in the domestic component of the money supply was caused by an expansion in non-credit related balance sheet items of Afl. 17.5 million, which was largely offset by an Afl. 12.8 million decrease in domestic credit. The increase in non-credit related balance sheet items was in part due to clearing transactions and a decline in other liabilities. The decline in domestic credit resulted from an Afl. 19.9 million decrease in claims of the banking sector on the public sector and an Afl. 7.1 million increase in claims of the banking sector on the private sector.

The contraction in the net claims of the banking sector on the public sector was mainly attributed to a rise in government deposits of Afl. 21.5 million. The expansion in the claims of the banking sector on the private sector resulted from an Afl. 9.3 million (+0.7

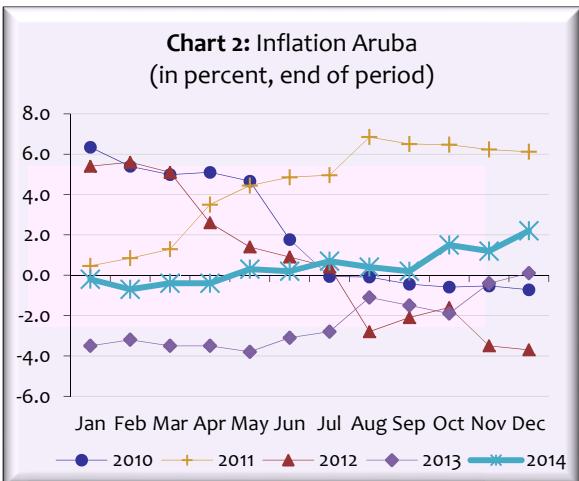

percent) increase in loans to enterprises and decreases in consumer credit and housing mortgages of, respectively, Afl. 1.7 million (-0.3 percent) and Afl. 0.5 million (Chart 1).

Inflation

The consumer price index (CPI) for December 2014 registered a 2.2 percent increase, compared to the same month of 2013 (Chart 2). The main contributors to this increase were the components “Housing” and “Food and Non-Alcoholic Beverages”. Excluding the effect of food and energy (which partly affects the housing and transport components), the core CPI increased by 1.0 percent, compared to December 2013 (Table A). The 12-month average inflation rate went up by 0.4 percent in December 2014, from 0.2 percent in November 2014 (Chart 3).

Tourism

In December 2014, the number of stay-over visitors totaled 109,854, which is 9.5 percent (+9,564 visitors) higher than in December 2013 (Chart 4). This rise was caused by increases in both the Latin American and North American markets of, respectively, 14.0 percent (+5,319 visitors) and 8.9 percent (+4,682 visitors). The expansion in the Latin American market was mostly associated with a 18.3 percent (+5,452 visitors) growth in the number of visitors from Venezuela, while the rise in the North American market was largely the result of a 8.2 percent (+3,800 visitors) increase in arrivals from the United States.

The total intended number of nights spent in Aruba rose by 6.0 percent to 826,429, while the average intended nights stayed contracted from 7.8 nights in December 2013 to 7.5 nights in December 2014.

The number of cruise visitors declined by 13,869 or 14.4 percent to 82,367 in December 2014, compared to the same month of the previous year. The number of ship calls shrank to 43 in December 2014, down from 50 in December 2013.

Source: Aruba Tourism Authority

Government revenue

In December 2014, total government revenue amounted to Afl. 119.0 million, Afl. 5.6 million lower than in the same month of the previous year. This contraction was caused by a decrease of Afl. 11.0 million in non-tax revenue and an increase of Afl. 5.3 million in tax revenue. The drop in non-tax revenue resulted largely because no dividend distributions took place in December 2014, compared to December 2013. The rise in tax revenue was mostly related to increases in profit tax (Afl. 4.4 million), wage tax (Afl. 2.2 million), motor vehicle fees (Afl. 1.9 million) and import duties (Afl. 1.5 million). These increases were partially offset by a decline in income tax (Afl. 6.6 million). In addition, turnover tax (B.B.O.) decreased marginally (Afl. 0.1 million).

B) Quasi-money		1,603.9	1,588.9	1,578.6	1,703.1	1,593.7	1,619.1	1,578.6	1,680.7	1,680.0	1,703.1

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
