## I. Main economic indicators

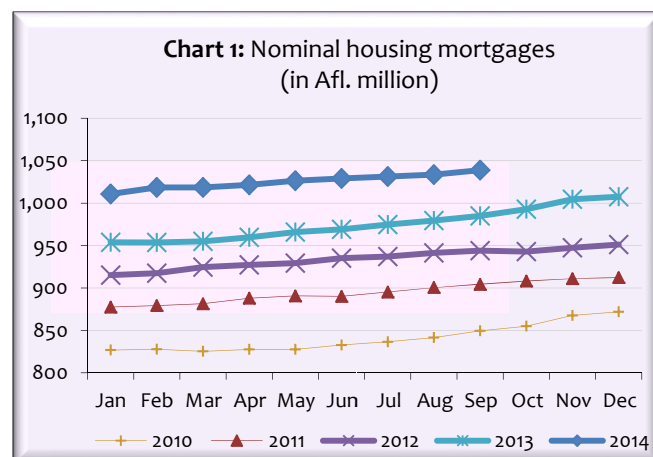

### Monetary developments

During the month of September 2014, money supply rose slightly by Afl. 0.8 million to Afl. 3,353.2 million, resulting from an Afl. 16.3 million increase in the net domestic assets, which was largely offset by an Afl. 15.5 million decrease in the net foreign assets (excluding revaluation differences of gold and foreign exchange holdings).

The growth in the domestic component of the money supply was brought about by an expansion in domestic credit of Afl. 36.2 million, while the non-credit related balance sheet items showed an Afl. 20.0 million decrease. The rise in domestic credit was caused by higher claims of the banking sector on both the private and public sector of, respectively, Afl. 19.6 million and Afl. 16.7 million.

The growth in the net claims of the banking sector on the public sector was mainly caused by a fall in government deposits of Afl. 19.1 million. The expansion in the claims of the banking sector on the private sector was attributed to increased loans to enterprises, housing mortgages, and consumer credit of, respectively, Afl. 15.0 million (+1.2 percent), Afl. 5.3 million (+0.5 percent) (Chart 1), and Afl. 0.4 million (+0.1 percent).

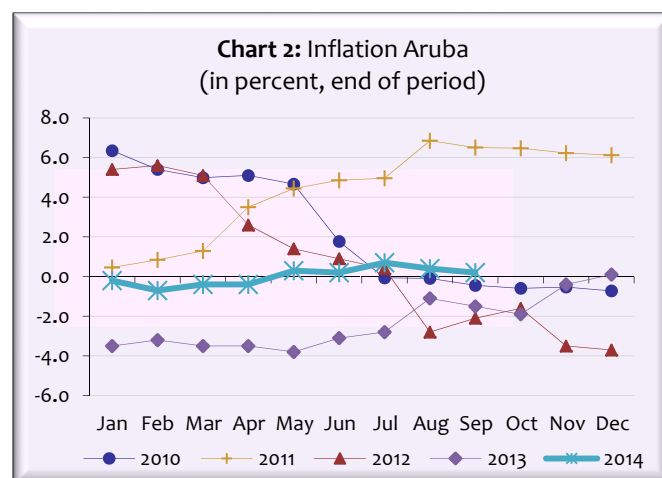

The Afl. 15.5 million decline in net foreign assets was mostly due to a deficit on the current account, resulting from shortfalls on the goods and income accounts, partially mitigated by a surplus on the service account. The latter was due to tourism receipts.

### Inflation

The consumer price index (CPI) for September 2014 registered a 0.2 percent increase, compared to the same month of 2013 (Chart 2). The main contributors to this increase were the components “Food and Non-Alcoholic Beverages” and “Housing”. Excluding the effect of food and energy (which partly impact the housing and transport components), the core CPI grew by 0.2 percent, compared to September 2013 (Table A). The 12-month average inflation rate declined by 0.2 percent in September 2014 (Chart 3).

## Tourism

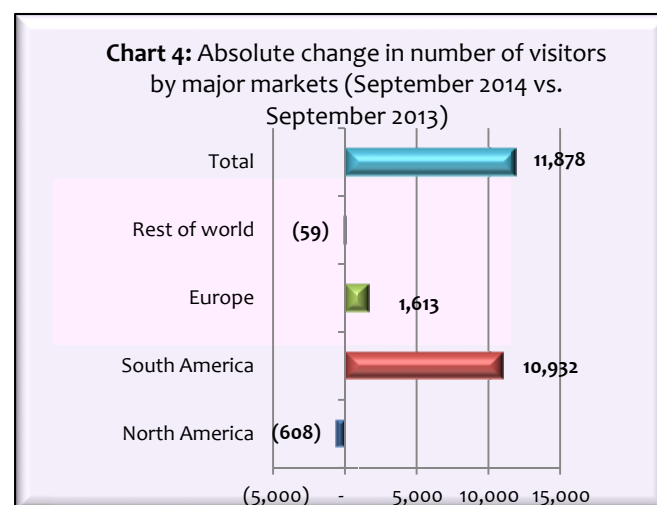

In September 2014, the number of stay-over visitors totaled 84,509, which is 16.4 percent (+11,878 visitors) higher than in September 2013 (Chart 4). This expansion was mainly caused by a 39.6 percent (+10,932 visitors) increase in the number of visitors from Latin America. The rise in the Latin American market was mostly associated with gains in the number of visitors from Venezuela, Suriname and Colombia of, respectively, 45.7 percent (+9,246 visitors), 109.4 percent (+923 visitors) and 60.6 percent (+708 visitors). In addition, the European market registered a 25.6 percent growth (+1,613

visitors) in the number of visitors. On the other hand, a marginal decrease of 1.7 percent (-608 visitors) was noted in the North American market.

The total intended number of nights spent in Aruba rose by 13.6 percent to 583,379, while the average intended nights stayed dropped slightly from 7.1 nights in September 2013 to 6.9 nights in September 2014.

The number of cruise visitors grew by 5,030 or 24.2 percent to 25,782 in September 2014, compared to the same month of the previous year.

The number of ship calls rose from 11 in September 2013 to 13 in September 2014.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
