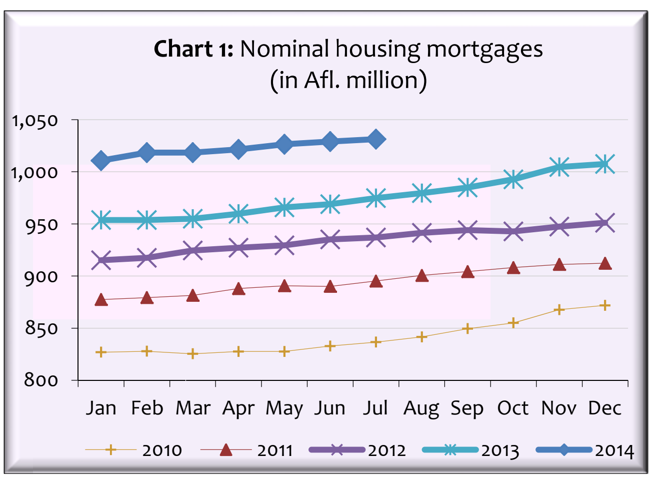
I. Main economic indicators

Monetary developments

During the month of July 2014, money supply contracted by Afl. 21.6 million to Afl. 3,400.5 million, resulting from an Afl. 47.5 million drop in net domestic assets, which was partly offset by an Afl. 25.9 million rise in the net foreign assets (excluding revaluation differences of gold and foreign exchange holdings).

The contraction in the domestic component of the money supply was brought about by a fall in domestic credit of Afl. 67.7 million, while the non-credit related balance sheet items showed an Afl. 20.2 million growth. The latter was attributed to clearing transactions. The reduction in domestic credit resulted from decreases in claims of the banking sector on both the public sector and the private sector of, respectively, Afl. 48.9 million and Afl. 18.8 million.

The decline in the net claims of the banking sector on the public sector was mainly caused by an Afl. 56.7 million expansion in the government deposits related to the issuance of Afl. 69.2 million in government bonds.



Source: Centrale Bank van Aruba

Claims on the private sector shrank due to reductions in loans to enterprises and consumer credit of, respectively, Afl. 15.6 million (-1.2 percent) and Afl. 5.6 million (-0.9 percent) (Chart 1). In contrast, housing mortgages grew by Afl. 2.4 million (+0.2 percent).

The Afl. 25.9 million growth in net foreign assets was mostly due to an Afl. 37.6 million receipt related to government bonds bought by non-residents as part of the total government bonds issuance mentioned earlier. This receipt was mitigated partially by an Afl. 17.0 million deficit on the current account, resulting from deficits on the goods, income and current transfer accounts, and a surplus on the service account, due to tourism receipts.

Inflation

The consumer price index (CPI) for July 2014 registered a 0.7 percent increase, compared to the same month of 2013 (Chart 2). The main contributors to this increase were the components “Transport” and “Food and Non-Alcoholic Beverages”. Excluding the effect of food and energy (which partly affects the housing and transport components), the core CPI grew by 0.1 percent, compared to July 2013 (Table A). The 12-month average inflation rate declined by 0.5 percent in July 2014 (Chart 3). Excluding the energy and food components, the core CPI remained unchanged (Table A).

Tourism

In July 2014, the number of stay-over visitors totaled 95,952 which is 9.4 percent (+8,258 visitors) higher than in July 2013. This rise was mainly the result of increases in the number of visitors from Latin America and North America of, respectively, 6,638 visitors (+31.5 percent) and 2,210 visitors (+4.0 percent). The expansion in the Latin American market was mostly associated with growths in the number of visitors from Venezuela and Colombia of, respectively, 47.7 percent (+6,236 visitors) and 31.5 percent (+498 visitors). The growth in the North American market was largely attributed to an increase in arrivals from the United States (+2,479 visitors or 4.7 percent).

In addition, the European market noted a growth of 3.3 percent (+233 visitors) in July 2014, compared to June 2013. The growth in the European market was largely attributed to higher arrivals from Germany (+111 visitors) and the United Kingdom (+424 visitors).

The total intended number of nights spent in Aruba rose by 5.2 percent to 685,265, while the average intended nights stayed dropped from 7.4 nights in July 2013 to 7.1 nights in July 2014.

The number of cruise visitors grew by 9,539 or 34.3 percent to 37,315 in July 2014, compared to the same month of the previous year. The number of ship calls rose from 15 in July 2013 to 16 in July 2014.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
