I. Main economic indicators

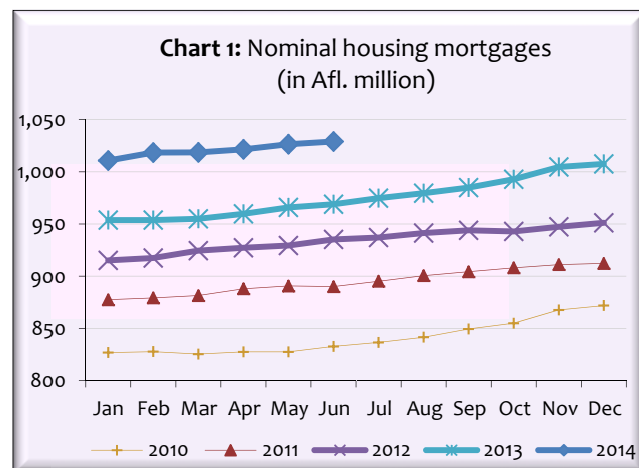

Monetary developments

During the month of June 2014, money supply rose by Afl. 15.1 million to Afl. 3,422.1 million, resulting from an Afl. 33.4 million increase in net domestic assets and an Afl. 18.2 million decrease in the net foreign assets (excluding revaluation differences of gold and foreign exchange holdings.). The Afl. 18.2 million reduction in net foreign assets was caused mainly by payments for the import of goods and services, which was partly mitigated by receipts from the export of services, including tourism.

The growth in the domestic component of the money supply was brought about by an increase in domestic credit of Afl. 43.7 million, while the non-credit related balance sheet items dropped by Afl. 10.3 million. The expansion in domestic credit resulted from higher claims of the banking sector on both the private sector and the public sector of, respectively, Afl. 24.9 million and Afl. 18.8 million.

Claims on the private sector reflected growths in loans to enterprises and housing mortgages of, respectively, Afl. 24.2 million (+1.9 percent) and Afl. 2.6 million (+0.3 percent) (chart 1). In contrast, consumer credit fell by Afl. 1.7 million (-0.3 percent).

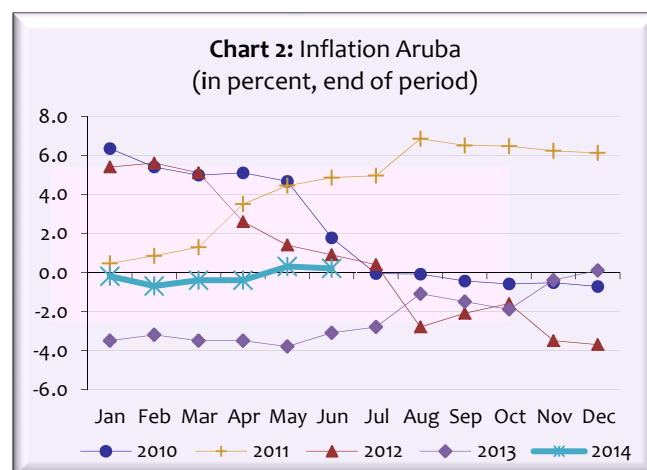

The expansion in the net claims of the banking sector on the public sector was mainly attributed to contractions in both the government deposits and development funds of Afl. 13.7 million and Afl. 3.0 million, respectively.

Inflation

The consumer price index (CPI) for June 2014 registered a 0.2 percent increase, compared to the same month of 2013 (Chart 2). The main contributor to this increase was the component "Transport". Excluding the effect of food and energy (which partly affects the housing and transport components), the core CPI shrank by 0.1 percent, compared to June 2013 (Table A). The 12-month average inflation rate declined by 0.7 percent in June 2014 (Chart 3). Excluding the energy and food components, the core CPI edged up by 0.1 percent (Table A).

Tourism

In June 2014, the number of stay-over visitors totaled 82,708, which is 7.5 percent (+5,744 visitors) higher than in June 2013. This rise was mainly the result of increases in the number of visitors from Latin America and Europe of, respectively, 5,953 visitors (+34.9 percent) and 232 visitors (+4.0 percent). The rise in the Latin American market was mostly associated with a 51.8 percent (+5,385 visitors) increase in the number of visitors from Venezuela. The growth in the European market was largely attributed to higher arrivals from Italy and the United Kingdom. In addition, the North

American market noted a slight growth of 0.2 percent (+83 visitors) in June 2014, compared to June 2013.

The total intended number of nights spent in Aruba rose by 4.8 percent to 573,091, while the average intended nights stayed dropped from 7.1 nights in June 2013 to 6.9 nights in June 2014.

The number of cruise visitors fell by 411 or 2.0 percent to 19,815 in June 2014, compared to the same month of the previous year. The number of ship calls dropped to 7 in June 2014, down from 12 in June 2013.

Government revenue

In June 2014, total government revenue amounted to Afl. 106.3 million, Afl. 15.9 million higher than the same month of the previous year. This rise was the result of an Afl. 18.5 million expansion in tax revenue and an Afl. 2.6 million decrease in non-tax revenue. The upturn in tax revenue was largely brought about by increases in receipts from land tax (+Afl. 6.8 million), profit tax (+Afl. 5.3 million), import duties (+Afl. 2.0 million), wage tax (+Afl. 1.6 million), excises on liquor (Afl. 1.3 million), income tax (Afl. 1.2 million), foreign exchange tax (+Afl. 1.1 million) and taxes on other services (Afl. 1.0 million). In contrast, income from transfer tax decreased by Afl. 1.1 million.

B) Quasi-money	1,781.6	1,603.9	1,588.9	1,579.2	1,704.1	1,706.7	1,689.7

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

June													

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-1) of the CBA.
