9. Government's position with the monetary system	11
10. Tourism	12
11. Growth in stay-over tourism	13
12. Consumer price index	14

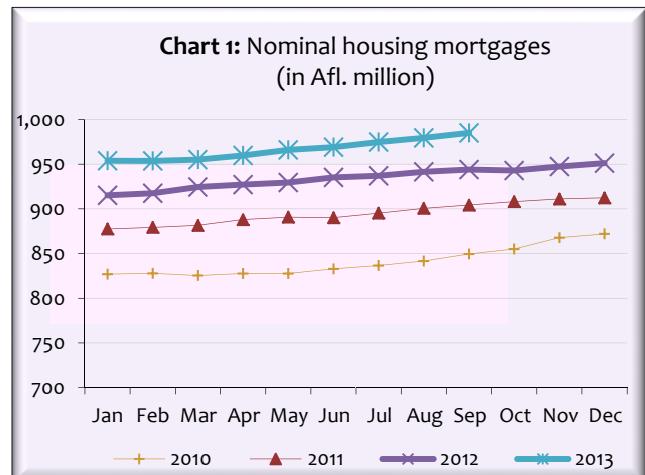

## I. Main economic indicators

### Monetary developments

During the month of September 2013, money supply dropped by Afl. 127.7 million to Afl. 3,291.0 million, resulting from a decrease of Afl. 264.3 million in net foreign assets (excluding revaluation differences of gold and foreign exchange holdings), which was partially offset by an Afl. 136.6 million rise in net domestic assets.

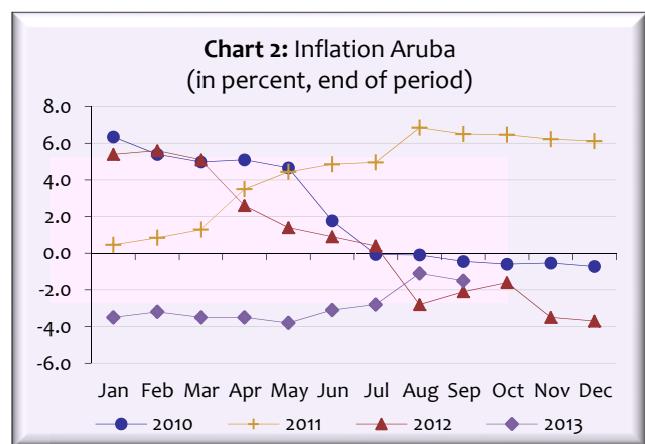

The fall in net foreign assets was caused mainly by payments on matured government bonds amounting to Afl. 119.3 million, that were issued on the international market and net transfers to foreign accounts of resident companies. Additionally, payments for the import of goods and services surpassed gross tourism receipts during the month under review.

The rise in the domestic component of the money supply was attributed to an Afl. 155.2 million expansion in domestic credit, which was in part offset by an Afl 18.6 million decrease in non-credit related balance sheet items. Domestic credit increased because the Afl. 147.5 million net claim of the public sector on the banking sector turned into an Afl. 4.5 million net liability of the public sector to the banking sector, stemming from a decrease in the government's deposits of Afl. 150.7 million. In addition, the claims on the private sector grew by Afl. 3.2 million, due to increases in housing mortgages and consumer credit of, respectively, Afl. 5.4 million (0.6 percent) and Afl. 0.8 million (0.1 percent) (Chart 1). The aforementioned increases were partly offset by a downturn in commercial loans in the amount of Afl. 2.3 million or 0.2 percent. The decline in non-credit related balance sheet items was caused largely by increases in balance sheet items "other liabilities" and "shareholders' equity".

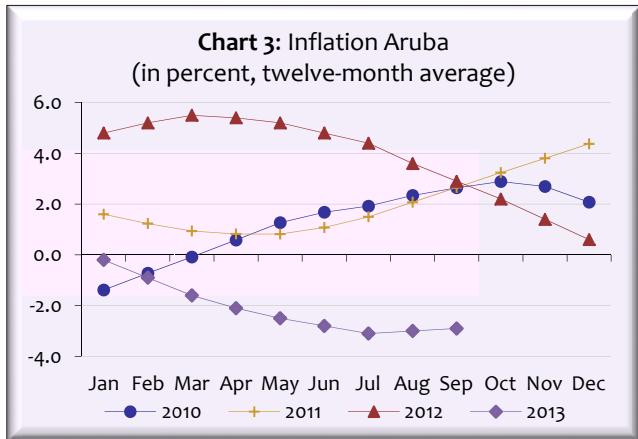

### Inflation

In September 2013, the consumer price index (CPI) registered a 1.5 percent decline, compared to the same month of 2012 (Chart 2). Contributory factors were housing, clothing & footwear, and transport. Excluding the effect of food and energy (which partly impacts the housing and transport components), the core CPI rose by 0.3 percent, compared to September 2012 (Table A).

The 12-month average inflation rate remained negative at -2.9 percent in September 2013 (Chart 3). Omitting the energy and food components, the core CPI went up by 0.1 percentage point (Table A).

**Table A. Components of Inflation**

Inflation components	End-month inflation		12-month average inflation	
	Sep-12	Sep-13	Sep-12	Sep-13

<b>Total</b>	<b>-2.1</b>	<b>-1.5</b>	<b>2.9</b>	<b>-2.9</b>
<b>Total Excluding Energy &amp; Food</b>	<b>0.6</b>	<b>0.3</b>	<b>0.5</b>	<b>0.1</b>

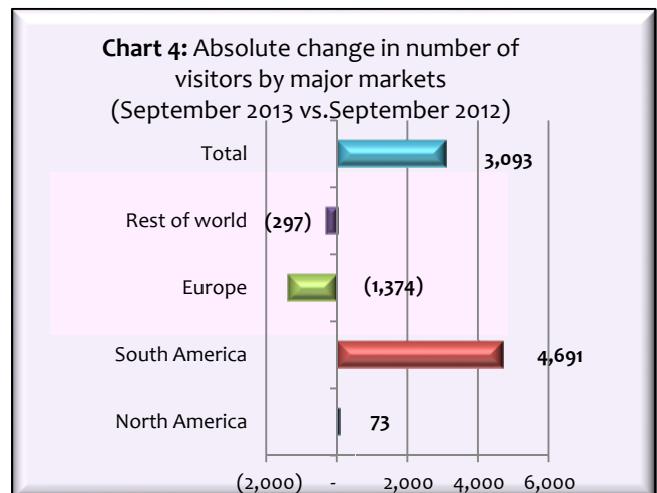

### Tourism

In September 2013, the number of stay-over visitors reached 72,631, which is 4.4 percent (+3,093 visitors) higher than in September 2012 (Chart 4). This growth was caused mainly by a rise in visitors from Latin America of 4,691 visitors (20.5 percent), which was partly offset by a decline in visitors from Europe of 1,374 (17.9 percent). In addition, the North American market recorded a slight increase, related to a rise in visitors from Canada of 140 (+6.0 percent), which more than compensated for the marginal decline of 67 visitors from the United States of America. The growth in the Latin American market was predominantly the result of higher arrivals from Venezuela (+3,909 visitors or +23.9 percent), while the shrinkage in the European

market was due to a setback in the number of visitors from the United Kingdom (-1,071 visitors or -44.6 percent).

The average nights stayed in Aruba fell slightly from 7.3 nights in September 2012 to 7.1 nights in September 2013.

The number of cruise visitors went up by 14,271 visitors (or 220.2 percent) in September 2013, compared to the same month of the previous year. The number of ship calls increased from 3 in September 2012 to 11 in September 2013.

B) Quasi-money	1,622.2	1,781.6	1,603.9	1,588.9	1,559.0	1,564.3	1,543.7

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-D) of the CBA.
