I. Main economic indicators

Monetary developments

In February 2013, money supply went down by Afl. 43.1 million to Afl. 3,408.8 million. This contraction resulted from decreases in both net domestic assets and net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) of, respectively, Afl. 34.9 million and Afl. 8.2 million.

The above-mentioned decrease in net domestic assets was largely the result of drops in domestic credit and non-credit related balance sheet items of, respectively, Afl. 18.0 million and Afl. 16.9 million. The decline in non-credit related balance sheet items was mostly due to clearing transactions. The decline in domestic credit was brought about by a contraction in the net claim of the banking sector on the public sector and net claim of the banking sector on the private sector of, respectively, Afl. 12.1 million and Afl. 5.9 million.

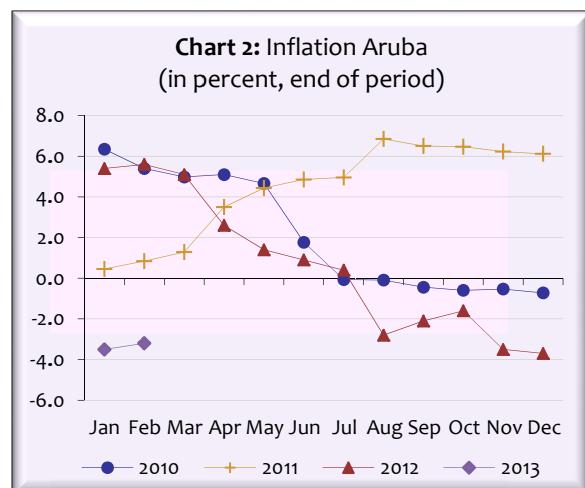

The decline in the net claim of the banking sector on the public sector was attributed to the Afl. 16.0 million rise in development funds, related to a contribution of Afl. 18.2 million by the Dutch government. The decrease in the banking sector's

claim on the private sector resulted mainly from the Afl. 9.0 million (-0.7 percent) contraction in commercial loans, which was partially offset by an Afl. 2.0 million (+0.1 percent) upturn in consumer credit. Furthermore, housing mortgages registered a marginal reduction of Afl. 0.1 million.

Inflation

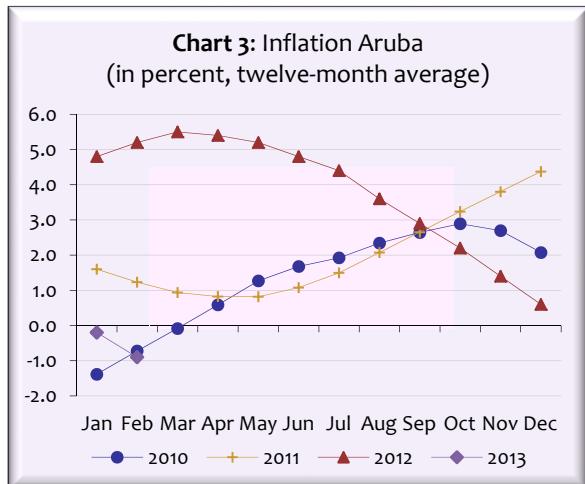

The consumer price index (CPI) for February 2013 registered a 3.2 percent decrease, compared to the same month of 2012 (Chart 2). The main contributors to this drop were housing, clothing & footwear, and household operation. Excluding the effect of food and energy (which partly impacts the housing and transport components), the core CPI edged up by 0.2 percent, compared to February 2012 (Table A).

The 12-month average inflation rate decelerated further to -0.9 percent in February 2013, down from -0.2 percent in January 2013 (Chart 3). Excluding the energy and food components, the core CPI decreased slightly by 0.1 percent (Table A).

Table A. Components of Inflation

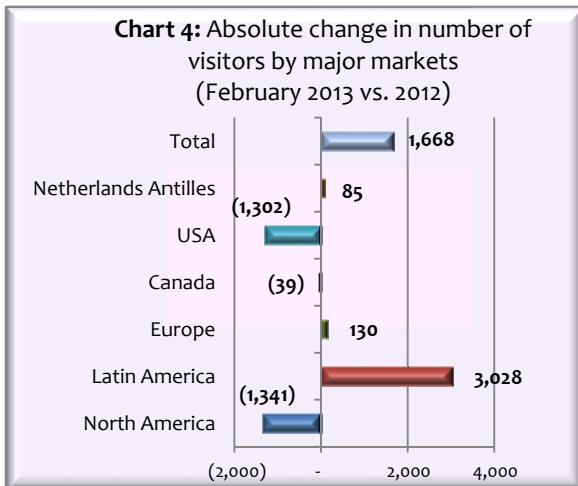

Inflation components	End-month inflation Feb-12	End-month inflation Feb-13	12-month average inflation Feb-12	12-month average inflation Feb-13

Total	5.6	-3.2	5.2	-0.9
Total Excluding Energy & Food	1.4	0.2	1.5	-0.1

Tourism

In February 2013, the number of stay-over visitors totaled 74,049, which is 2.3 percent (+1,668 visitors) higher than in February 2012. This growth was caused mainly by a 25.8 percent (+3,028 visitors) rise in the number of visitors from Latin America, attributed mostly to an expansion in visitors from Venezuela of 35.1 percent (+2,447 visitors). Additionally, the European market noted a marginal growth of 130 visitors or 2.2 percent. On the other hand, the North American market fell by 2.6 percent (-1,341 visitors), as arrivals from both

the U.S.A. and Canada dropped by, respectively, 1,302 (-2.8 percent) and 39 (-0.7 percent) visitors.

The average nights stayed on the island dropped marginally from 8.0 nights in February 2012 to 7.7 in February 2013. The number of nights stayed by visitors from Venezuela was below this total average by registering 5.0 average nights stayed, while that of United States arrivals totaled 7.7 nights.

The number of cruise visitors declined by 5,346 or 5.7 percent to 88,888 in the month of February 2013, compared to the same month of the previous year. The number of ship calls fell slightly from 44 to 43 in February 2013, compared to February 2012.

Government revenue

In February 2013, total government revenue surged by Afl. 31.2 million, caused by increases in both tax and non-tax revenue. Non-tax revenue noted an Afl. 15.8 million gain, reflecting an Afl. 18.2 million receipt in connection with a contribution of the Dutch government to the development fund foundation of Aruba (F.D.A.). Tax revenue recorded a growth of Afl. 15.4 million or 22.7 percent, compared to the same month of the previous year. This was associated mostly with a

rise of Afl. 13.0 million in profit tax, due partly to the continuation of the tax settlement programs. Income tax also noted a surge of Afl. 3.9 million, compared to February 2012. On the other hand, drops were registered in excises on beer, tobacco, liquor, and foreign exchange tax of, respectively, Afl. 1.2 million, Afl. 1.1 million, Afl. 0.6 million, and Afl. 0.6 million.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
