No. 298

## I. Main economic indicators

### Monetary developments

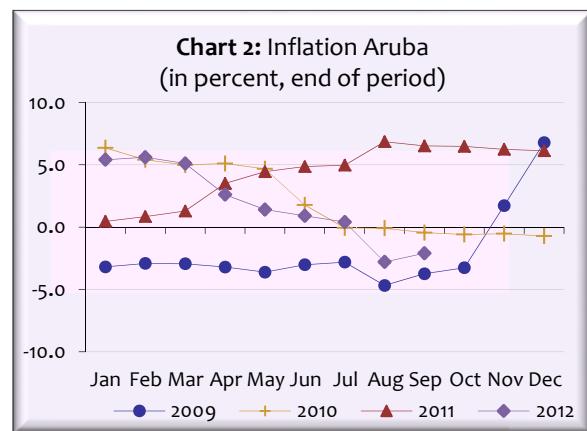

During the month of September 2012, broad money grew by Afl. 127.4 million to Afl. 3,264.3 million, resulting from an Afl. 401.2 million rise in net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) to Afl. 1,443.1 million, which was largely offset by an Afl. 273.9 million drop in net domestic assets. The growth in net foreign assets was caused mainly by a net inflow of foreign exchange related to the issuance of bonds of Afl. 452.9 million (USD 253 million) by the government on the international market, which was partially offset by a net outflow of foreign exchange associated with net payments for the import of goods and services, and investment income (interest and dividend) settled through the banking system.

The drop in the domestic component of the money supply was associated with declines in domestic credit and non-credit related balance sheet items of, respectively, Afl. 248.8 million and Afl. 25.0 million. Domestic credit decreased because the Afl. 176.5 million net liability of the public sector to the banking sector turned into an Afl. 74.2 million net claim of the public sector on the banking sector, stemming from a surge in the government's deposits of Afl. 259.4 million, reflecting the issuance of bonds by the government mentioned above. In contrast, claims of the banking sector on the private sector went up slightly by Afl. 1.8 million (+0.1 percent), following increases in consumer credit and housing mortgages of, respectively, Afl. 8.1 million and Afl. 2.5 million, while commercial loans fell by Afl. 8.6 million.

### Inflation

The consumer price index (CPI) for September 2012 registered a 2.1 percent decrease, compared to the same month of 2011 (Chart 2). The main contributors to this drop were housing, clothing & footwear, and household operation. Excluding the effect of food and energy (which partly affects the housing and transport components), the core CPI showed a 0.6 percent decrease compared to September 2011, brought about by declines in the index categories of clothing, household operation, and recreation and culture (Table A).

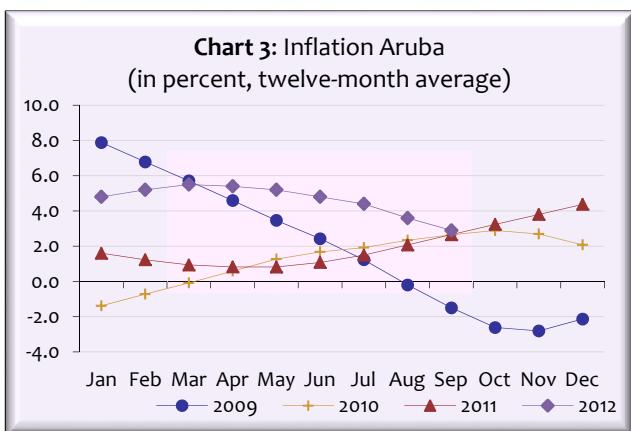

The 12-month average inflation rate reached 2.9 percent in September 2012, down from 3.6 percent in August 2012 (Chart 3). Excluding the energy and

food components, the core CPI increased by 0.5 percent, associated with higher prices of transport components (excluding the energy components gasoline and diesel), restaurant and hotels, as well as communication (Table A).

**Table A. Components of Inflation**

Inflation components	End-month inflation Sep-11	12-month average inflation Sep-11	12-month average inflation Sep-12
Food and Non-Alcoholic Beverages	0.8	0.3	0.5
Beverages And Tobacco Products	0.1	0.1	0.0

<b>Total</b>	<b>6.5</b>	<b>-2.1</b>	<b>2.9</b>
<b>Total Excluding Energy &amp; Food</b>	<b>1.9</b>	<b>-0.6</b>	<b>0.5</b>

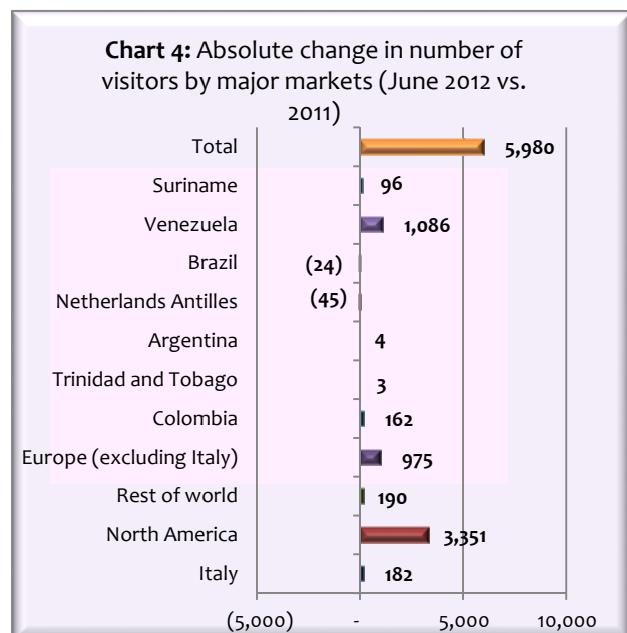

## Tourism

The number of stay-over visitors totaled 69,718 in September 2012, which is 9.4 percent higher than in September 2011. This growth was caused by increases in the number of visitors from North America, Latin America and Europe of, respectively, 10.2 percent (+3,351 visitors), 6.7 percent (+1,443 visitors), and 17.6 percent (1,157 visitors). The growth in the North American market resulted from hikes in arrivals from the United States and Canada of, respectively, 7.8 percent

(+2,458 visitors) and 61.3 percent (+893 visitors). The Latin American market continued to expand, attributed mostly to an increase in visitors from Venezuela of 7.1 percent (+1,086 visitors). The other Latin American market segments that experienced a growth were Colombia (+162 visitors), and Panama and Chile (+219 visitors).

The rise in the European market is associated mainly with increases in visitors from the Netherlands and England of, respectively, 467 and 318.

The number of cruise visitors went up by 1,829 or 39.3 percent to 6,481 in the month of September 2012 compared to the same month of the previous year. The number of ship calls declined slightly from 4 to 3 in September 2012 compared to the corresponding month a year earlier.

#### *Government revenue*

In September 2012, registered tax revenue totaled Afl. 77.4 million, an increase of Afl. 12.8 million or 19.8 percent, compared to the same month of the previous year. This growth was associated mostly with surges in revenue from profit, wage and land tax of, respectively, Afl. 4.4 million, Afl. 3.1 million and Afl. 3.1 million. Foreign exchange tax and turnover tax (BBO) both noted increases of, respectively, Afl. 1.9 million and Afl. 0.6 million. On the other hand, non-tax revenue recorded a fall of Afl. 3.8 million in September 2012 compared to the same month of last year, due to a decrease of Afl. 1.1 million in income received from leases of land.

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-D) of the CBA.
