No. 289

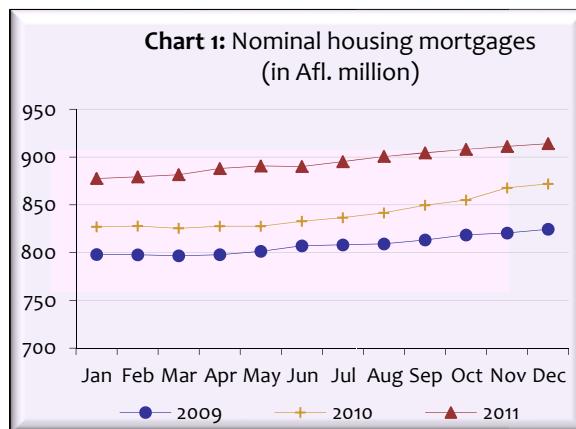

I. Main economic indicators

Monetary developments

During the month of December 2011, the money supply edged down by Afl. 83.9 million to Afl. 3,158.7 million, resulting from an Afl. 99.4 million decrease in net domestic assets to Afl. 1,872.5 million at the end of December 2011. This decrease was partially offset by an Afl. 15.6 million rise in the foreign component of the money supply.

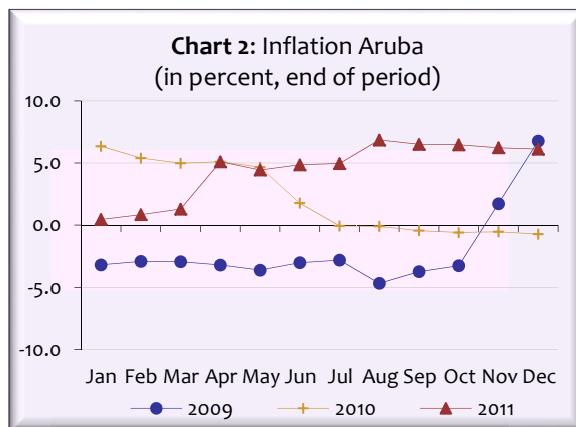

The fall in net domestic assets was because the Afl. 75.3 million in net liabilities of the public sector on the banking sector at the end of November 2011 turned into an Afl. 36.6 million net claim of the public sector on the banking sector at the end of December 2011. This turnaround resulted from an Afl. 74.7 million increase in the government's deposits at the banking sector, which was partially offset by an Afl. 37.2 million decline in gross claims of the banking sector on the public sector. The growth in government deposits was largely brought about by the issuance of government bonds in December 2011.

In addition, non-credit related balance sheet items and claims on the private sector expanded by, respectively, Afl. 7.6 million and Afl. 4.8 million (+0.2 percent). Commercial loans and housing mortgages increased by, respectively, Afl. 4 million (0.4 percent) and Afl 1.2 million (0.1 percent) (chart 1).

Inflation

The consumer price index (CPI) for December 2011 registered a 6.1 percent rise, compared to the same month of 2010 (Chart 2). The main components that contributed to this increase were transport, recreation and culture, and communication (Table A).

The index for all items less food and energy (which partly affect the housing and transport components), the so-called core CPI, went up by 1.7 percent compared to December 2010 (Table A). This rise can be attributed to a surge in the prices of transport (price new cars), recreation and culture (cable subscriptions &

personal computers), and communication (prepaid telephone cards).

**Table A. Components of inflation
(end – December inflation)**

Inflation components	End - December inflation (2011)	Excluding food and energy components	End - December inflation (2010)	Excluding food and energy components
HOUSING	3.5	0.5	0.6	0.4
TRANSPORT	1.3	0.6	-0.3	-0.5
FOOD AND NON-ALCOHOLIC BEVERAGES	0.8	0.1	0.0	0.0

COMMUNICATION	0.2	0.2	0.0	0.0
Total	6.1	1.7	-0.7	-1.0

The 12-month average inflation rate reached 4.4 percent in December 2011 (Chart 3). When subtracting the energy and food components from the 12-month average rate, the CPI rose by 1.2 percent, associated with higher prices for transport (vehicle parts), recreation and culture (cable subscriptions and cruise ship travel), and communication (prepaid telephone cards) (Table B).

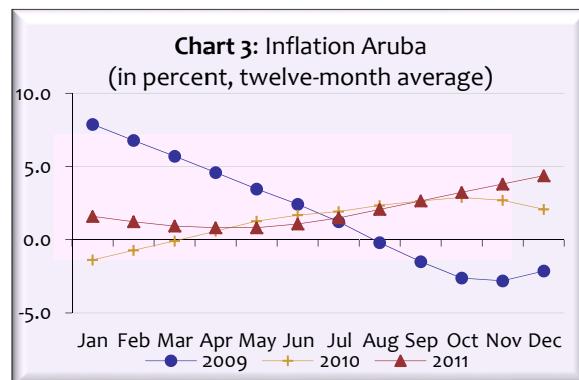

**Table B. Components of inflation
(12-month – ending December inflation)**

Inflation components	12 month - ending December inflation (2011)	Excluding food and energy components	12 month - ending December inflation (2010)	Excluding food and energy components

Tourism

During the month of December 2011, foreign air and sea visitors marked an all-time high, as

stay-over arrivals reached 81,455 (+3,793 visitors or 4.9 percent), and cruise tourism received 103,268 (+20,493 visitors or 24.8 percent), compared to December 2010 (chart 4). Stay-over visitors grew by 5.7 percent compared to 2010.

The improved performance in cruise tourism resulted mainly from higher occupancy rates when compared to December 2010. There were 49 ship calls for the month of December, which represented only 2 ship calls more compared to December 2010.

The Latin American market outshined its peers in growth, primarily due to an upturn of 1,977 (+13.1 percent) more Venezuelan visitors who

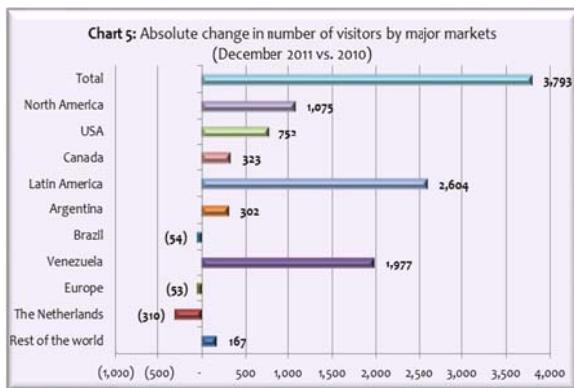

travelled to Aruba during December 2011, compared to the corresponding period in 2010. Flights from Venezuela reportedly increased due to the intensification of adds and promotions for December 2011. The Argentinian market registered a gain of 302 (+91.5 percent) to 632 passengers, compared to December 2010. Whereas most of the markets within Latin America sustained growths, the Brazilian market recorded a slight drop of 54 (-2.3 percent) passengers, compared to the corresponding period in 2010.

The North American market displayed an increment of 2.3 percent, as arrivals from the United States and Canada rose by, respectively, 1.8 percent (+752 visitors) and 6.4 percent (+323 visitors), compared to December 2010 (Chart 5). Travel from Europe experienced a slight reduction of 0.8 percent (-53 visitors), mostly due to a decline of 8.7 percent (-310 visitors) originating from the Netherlands. Markets within Europe exhibiting growth were Italy and Germany with expansions of, respectively, 13.9 percent (+57 visitors) and 20.9 percent (+45 visitors) compared to the corresponding period in 2010.

A slight measure of improvement was noted in the diversification index, as the level of concentration moved from 0.35 in December 2010 to 0.34 in December 2011. This development reveals Latin America's 1.9 percent rise in market share and North America's 1.5 percent fall in market share, compared to December 2010.

Government revenue

Tax revenue for the month of December 2011 totaled Afl. 81.9 million, a decline of Afl. 3 million (-3.5 percent), compared to the same month of the previous year. Revenue reductions were registered in taxes on commodities (-Afl. 4.6 million) and services (-Afl. 3.7 million). These drops were partially offset by higher income from profit tax (+Afl. 2.5 million) and taxes on property (+Afl. 1.2 million), related chiefly to a rise in early payments made for motor vehicle fees (+Afl. 1.1 million), while those from the turnover tax (BBO) rose marginally by Afl. 0.7 million. The decline in taxes on services is associated with the introduction of the tourist levy¹.

¹ The tourist levy replaced the hotel room tax as of January 1, 2011. The tourist levy proceeds are transferred to the Aruba Tourism Authority and, thus, do not form part of the tax revenue.

B) Quasi-money	1,593.6	1,622.2	1,781.6	1,603.9	1,689.7	1,720.3	1,781.6	1,591.7	1,602.4	1,603.9

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
