No. 286

I. Main economic indicators

Monetary developments

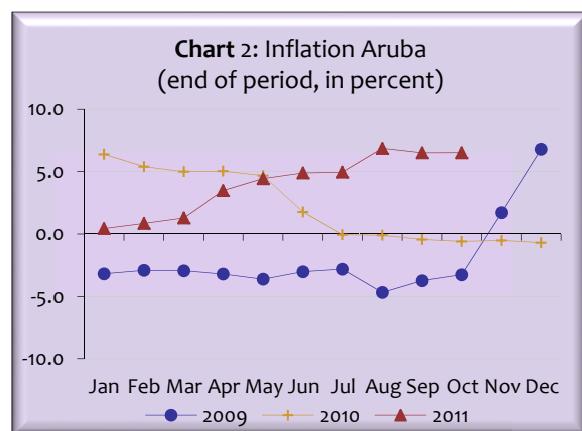

The money supply decreased by Afl. 0.8 million to Afl. 3,217.4 million during the month of September 2011, as the Afl. 18.8 million net outflow of foreign funds was largely offset by an Afl. 18.0 million rise in the net domestic assets. In comparison to September 2010, the net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) fell by Afl. 189.9 million to Afl. 1,238.1 million, which is still within a comfortable range.

The expansion in net domestic assets is attributable to an increase in net claims on the public sector, due to a decline of Afl. 33.6 million in government deposits that was partly related to bond repayments. Net claims on the private sector expanded as well, namely by Afl. 4.6 million (+0.2 percent) resulting from a rise in consumer credit and housing mortgages of Afl. 8.1 million (+1.5 percent) and Afl. 3.7 million (+0.4 percent), respectively (Chart 1). The growth in consumer credit was, for the most part, due to more aggressive lending campaigns, in particular for car loans, during the period under review. On the other hand, business loans decreased by Afl. 6.5 million (-0.6 percent), mainly related to repayments on long-term loans and commercial mortgages, as well as current account withdrawals.

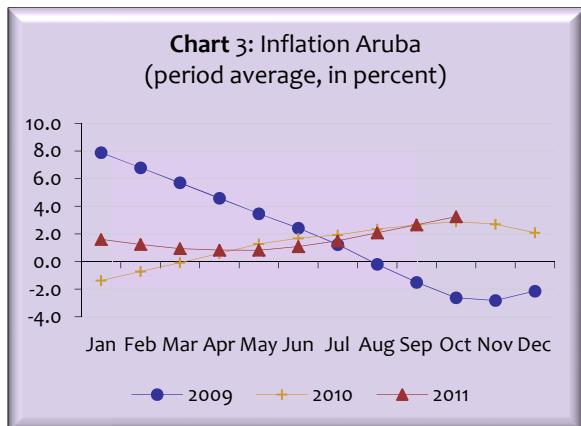

Inflation

The consumer price index (CPI) for October 2011 rose by 6.5 percent, compared to October of last year (Chart 2), mostly attributed to higher utility and gasoline prices. When excluding the effects of the energy component, the CPI recorded a 2.3 percent acceleration, which is largely related to an upswing in the prices of food, as well as recreation and culture.

The 12-month average inflation rate for October 2011 rose to 3.2 percent, when compared to the same period of last year (Chart 3). When subtracting the energy component from the 12-month average rate, consumer prices augmented by 1.1 percent, the result of an increase in prices of food, beverages and tobacco products, communication, and recreation and culture.

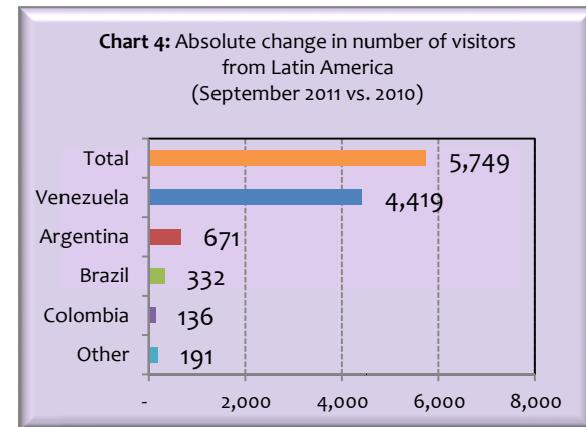

Tourism

The tourism sector continued to perform well during the month of September 2011 with total stay-over tourists reaching 63,906, a gain of 5,460 visitors (+9.3 percent) when compared to the same month of 2010. The debut of the Aruba Music Explosion festival during the period under review contributed, for the most part, to the growth in visitors.

The South American market continues to be of growing importance to Aruba, with expansions in tourists stemming from this region (Chart 4). Most notable was a 40.5 percent jump in tourist arrivals from Venezuela, which is largely associated with the aforementioned festival. Decreases were registered in North America and Europe,

mainly due to drops in travelers from the United States (-3.1 percent), and the Netherlands (-4.2 percent). The decline in airlift out of the New York City and Boston gateways, as well as a reduction in seat capacity from major airlines, contributed to the contraction in the United States market.

In contrast, cruise tourism did not perform as well, with the number of passengers falling to 4,652, a reduction of 2,826 passengers (-37.8 percent) for the month under review. Although there were four ship calls for the month of September 2011 (September 2010: three calls), the average passenger capacity of the ships was smaller in comparison to September of last year.

Government revenue

According to the figures of the Tax Department, tax revenue for the month of September 2011 totaled Afl. 64.6 million on a cash basis, a drop of Afl 6.8 million (-9.5 percent) when compared to the same month of 2010. Declines were recorded in most categories, with the exception of taxes on commodities where import duties rose by

Afl. 1.8 million, along with an Afl. 0.7 million increase in the turnover tax (B.B.O.). Decreases were noted in the receipts from taxes on income and profit (-Afl. 2.7 million), foreign exchange tax (-Afl. 1.0 million), taxes on property (-Afl. 1.6 million), and taxes on services (-Afl. 3.1 million). The latter is, however, associated with the introduction of the tourist levy¹.

II. Operations of the CBA

Treasury bills

On September 2, 2011, Afl. 25.0 million in three-month treasury bills was issued at an average price of Afl. 99.75 per Afl. 100 nominal, yielding 1.0 percent on a yearly basis.

In addition, Afl. 40.0 million in three-month treasury bills was issued on September 9, 2011, at an average price of Afl. 99.75 per Afl. 100 nominal, yielding 1.0 percent on a yearly basis.

Cash loan certificates

On September 30, 2011, Afl. 8.0 million in cash loan certificates was issued at an average price of Afl. 99.645 per Afl. 100 nominal, yielding 0.807 percent on a yearly basis.

¹ The tourist levy replaced the hotel room tax as of January 1, 2011. The tourist levy proceeds goes directly to the Aruba Tourism Authority and, thus, do not form part of the tax income.

B) Quasi-money	1,147.1	1,396.8	1,541.3	1,373.0	1,538.9	1,585.3	1,537.5	1,575.9	1,606.6
1,419.3	1,593.6	1,622.2	1,781.6	1,682.8	1,652.2	1,704.2	1,613.3	1,611.6	1,608.6

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-D) of the CBA.
