No. 285

## I. Main economic indicators

### Monetary developments

Money supply went up by Afl. 29.0 million to Afl. 3,218.2 million during August 2011, as a result of an Afl. 46.8 million increase of in net domestic assets. The latter was partly offset by a net outflow of foreign funds of Afl. 17.8 million. The net outflow of foreign funds was mostly associated with higher import payments for goods and dividend payments. These payments were in part compensated by increased tourism receipts, as well as net inflows from foreign bank deposits of residents.

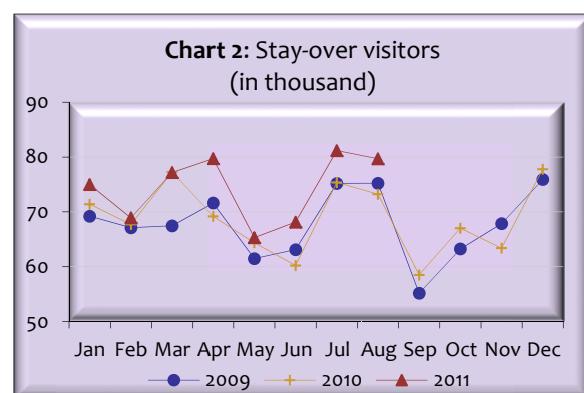

The rise in the net domestic assets was attributed to an Afl. 27.4 million drop in government's deposits and an Afl. 18.1 million increase in non-credit related balance sheet items. On the other hand, claims on the private sector decreased by Afl. 0.9 million as credit to enterprises and consumer credit fell by Afl. 3.8 million and Afl. 2.5 million, respectively. These reductions were largely offset by the rise in housing mortgages of Afl. 5.4 million.

As a result of the net outflow of foreign funds, net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) went down to Afl. 1,256.9 million, which was Afl. 245.0 million (-16.3 percent) less than the amount recorded in August 2010 (Chart 1).

### Tourism

During August 2011, the number of stay-over visitors grew by 6,457 (+8.8 percent) compared to August 2010 (Chart 2). This increase can mostly be attributed to the Latin American market, which strengthened by 26.6 percent or 5,090 visitors (Venezuela: +4,508; Argentina: +543). In addition, the number of visitors from Europe pitched up by 22.7 percent or 1,661 visitors (Italy: +802; United Kingdom: +514). Cruise tourism went up (+10.0 percent) in August 2011 compared to August 2010. During this period there were 6 ship calls, compared to 2 ship calls during the same month of last year.

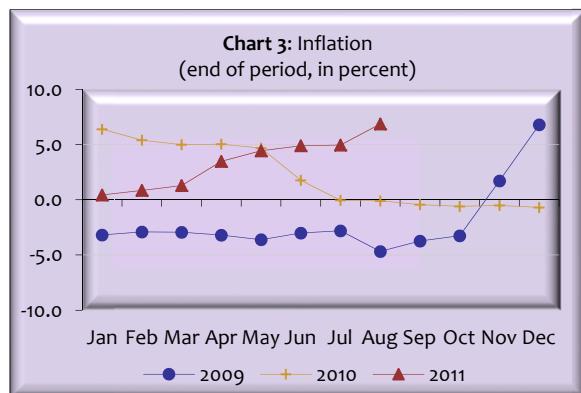

For the period of January up to and including August 2011, total cruise passengers and stay-over arrivals went up by 10.7 percent and 6.5 percent respectively compared to the corresponding period of 2010.

## Inflation

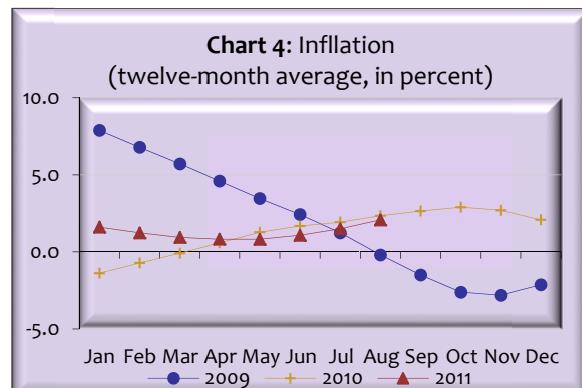

The consumer price index (CPI) for August 2011 registered a 6.8 percent jump compared to a 0.1 percent decline in the same month of 2010 (Chart 3). The energy and food components of the CPI contributed with 4.6 percentage points to this acceleration:

- Gasoline and diesel: +1.6 percentage points;
- Electricity, gas and other fuels: +1.3 percentage points;
- Water supply and miscellaneous services relating to the dwelling: +1.1 percentage points;
- Food: +0.6 percentage point.

When excluding the food and energy components, the CPI recorded an increase of 2.2 percent.

The 12-month average inflation rate reached 2.1 percent in August 2011 (Chart 4). When excluding the energy and food components from the CPI, this resulted in a deflation of 0.4 percent. Note that the higher CPI level of the recent months is only partially reflected in the 12-month-average inflation rate, due to the lagging effect associated with this calculation method.

## Government

In August 2011, tax revenues decreased by Afl. 0.8 million, when compared to the same month of 2010. The tax components that posted a decline in receipts in August 2011 were:

- Hotel room tax<sup>1</sup>: -Afl. 3.7 million;
- Transfer tax: -Afl. 3.1 million;
- Wage tax: -Afl. 2.2 million.

On the other hand, the proceeds from import duties (+Afl. 2.3 million), profit tax (+Afl. 1.9 million), foreign exchange tax (+Afl. 1.9 million), and turnover tax (B.B.O.) (+Afl. 1.1 million) grew during the month under review.

## II. Operations of the CBA

On September 29, 2011, the CBA assisted the government with the placement of Afl. 29.5 million in 13-year government bonds at par with an annual yield of 4.5 percent.

<sup>1</sup> The tourist levy replaced the hotel room tax as of January 1, 2011. The tourist levy proceeds goes directly to the Aruba Tourism Authority and, thus, do not form part of the tax income.

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
