No. 284

I. Main economic indicators

Monetary developments

In July 2011, the money supply declined by Afl. 12.6 million to Afl. 3,176.9 million, as a result of an Afl. 46.7 million outflow of foreign, which was mostly offset by an Afl. 34.1 million increase in net domestic assets. The net outflow of foreign funds was mostly associated with higher import payments for investment goods. These payments were in part compensated by increased tourism receipts, as well as net inflows from foreign bank deposits of residents and long-term loans. On balance, net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) fell to Afl. 1,274.7 million, which was Afl. 236.5 million (-15.6 percent) less than the amount recorded in July 2010.

The rise in the net domestic assets was attributed to an Afl. 28.6 million increase in claims on the private sector as credit to enterprises, housing mortgages and consumer credit rose by Afl. 22.8 million (+2.1 percent), Afl. 5.0 million (+0.6 percent), and Afl. 0.9 million (+0.2 percent), respectively.

Credit to enterprises expanded for the third consecutive month (Chart 1). It was triggered largely by higher current account credit and term loans to enterprises.

Tourism

During July 2011, the number of stay-over visitors grew by 5,812 (+7.7 percent) compared to July 2010. This increase in visitors can be mostly attributed to the U.S. (+3,060 visitors) and Venezuelan (+1,875 visitors) tourism markets. Similarly, cruise tourism went up by 6.8 percent (+328 passengers) in July 2011 compared to July 2010. Preliminary figures of tourism receipts, as registered by the commercial banks and the CBA, recorded an 11.6 percent (+Afl. 15.9 million) hike in July 2011 when compared to the same period of last year (Chart 2).

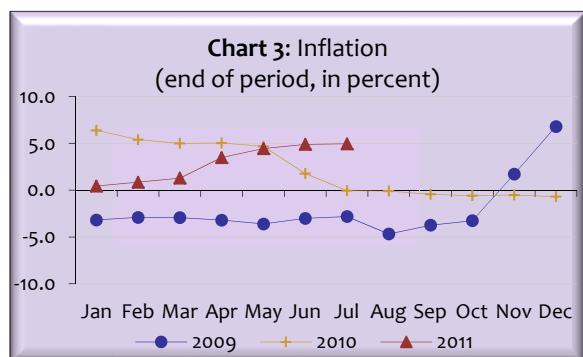

For the period of January up to and including July 2011, total cruise passengers and stay-over arrivals went up by 10.7 percent and 6.2 percent respectively, whereas the preliminary figures of the tourism receipts show a growth of 6.9 percent (+Afl. 75.8 million), compared to the corresponding period of 2010.

Inflation

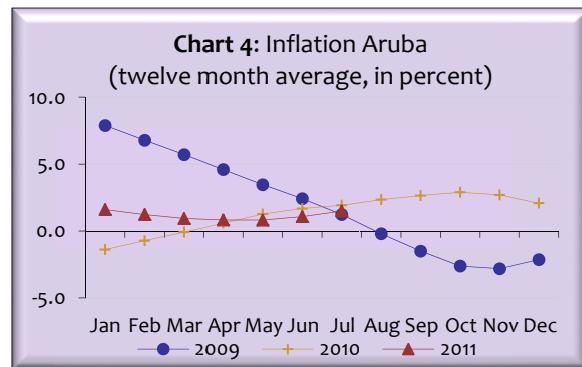

The consumer price index (CPI) for July 2011 registered a 5.0 percent jump compared to the same month of 2010 (Chart 3). The energy components of the CPI contributed with 2.6 percentage points to this acceleration:

- gasoline and diesel: +1.3 percentage points;
- electricity, gas and other fuels: +0.9 percentage point;
- water supply and miscellaneous services relating to the dwelling: +0.3 percentage point.

Together, these components account for 17.1 percent of the CPI. When excluding the food and energy components, the CPI recorded an increase of 1.8 percent.

The 12-month average inflation rate reached 1.5 percent in July 2011 (Chart 4). When excluding the energy and food components from the CPI, this resulted in a deflation of 0.1 percent. Note that the higher CPI level in recent months is only partially reflected in the 12-month-average inflation rate due to the lagging effect caused by this method of calculating inflation. Consequently, the expectation is that the 12-month average inflation rate will steadily increase in the coming months.

Government revenue

Tax revenue recorded an Afl. 6.7 million gain in July 2011 compared to July 2010. The main factors behind this growth were the rise in receipts from taxes on income and profit (+Afl. 10.2 million) and taxes on commodities (+Afl. 2.2 million). On the other hand, proceeds from taxes on property and taxes on services declined by, respectively, Afl. 4.6 million and Afl. 2.3 million.

A) Money	1,147.1	1,396.8	1,541.3	1,373.1	1,673.9	1,641.9	1,538.9
B) Quasi-money	1,419.3	1,593.6	1,622.2	1,781.6	1,620.7	1,597.1	1,682.8

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
