I. Main economic indicators

Monetary developments

In June 2011, the money supply contracted by Afl. 27.2 million to Afl. 3,189.4 million, largely as a result of an Afl. 18.1 million decrease in the net domestic assets. The latter was attributed to an Afl. 18.6 million decline in non-credit related balance sheet items, mainly reflecting clearing transactions. In addition, government's transactions contributed Afl. 13.5 million to the drop in net domestic assets, on balance the result of an Afl. 73.7 million rise in government's deposits and an Afl. 60.2 million drop in liabilities to the monetary system. Claims on the private sector increased by Afl. 14.0 million, partly mitigating this contraction in money supply, as credit to enterprises and consumer credit grew by Afl. 12.1 million (+1.1 percent) and Afl. 2.6 million (+0.5 percent), respectively. For the second month in a row, credit to enterprises showed an increase, caused predominantly by higher current account credit to enterprises. The total amount of housing mortgages fell by Afl. 0.5 million (-0.1 percent), the first drop since March 2010.

In addition, net foreign assets declined by Afl. 9.1 million. As a result, these assets (excluding revaluation differences of gold and foreign exchange holdings) went down to Afl. 1,321.4 million, which is Afl. 230.7 million (-14.9 percent) less than the amount recorded in June 2010.

In the month under review, the net foreign assets of the commercial banks dipped by Afl. 77.4 million, mostly on account of the sale of foreign exchange reserves to

the Centrale Bank van Aruba (CBA). Consequently, the CBA registered an increase in net foreign assets of Afl. 68.3 million. At the end of June 2011, 88.6 percent of the international reserves were held by the CBA, up from 83.9 percent at the end of May 2011.

During the second quarter of 2011, money supply went up by Afl. 15.3 million (+0.5 percent), resulting from an expansion in net domestic assets of Afl. 24.7 million, partly offset by a net outflow of funds to abroad of Afl. 9.4 million (Table A).

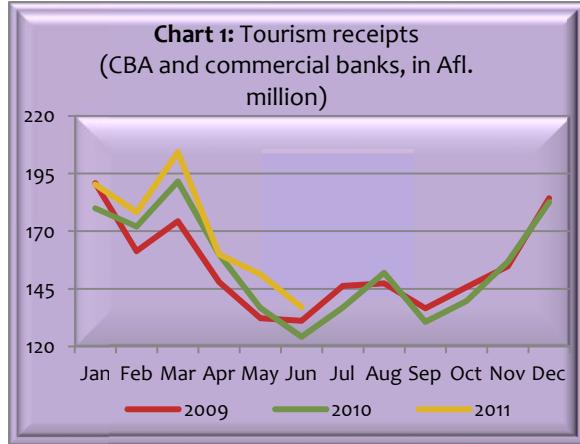

Table A: Causes of changes in broad money (in Afl. million)

	Second quarter of		
	2009	2010	2011

B) Commercial banks	58.1	-68.5	-97.8
III. Broad money	33.8	-3.9	15.3

Source: CBA.

Tourism

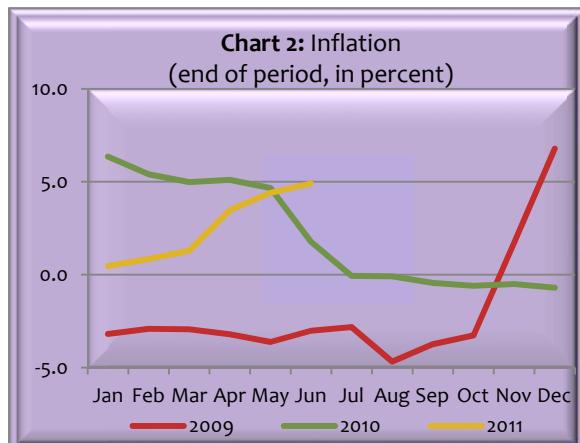

Stay-over tourism continued to perform well. The number of stay-over visitors grew by 13.1 percent to 68,136 visitors in June 2011. Also, tourism receipts, as reported by the commercial banks and the CBA, recorded a 10.3 percent increase in June 2011 when compared to the same period of last year (Chart 1). On the other hand, cruise tourism recorded a decline of 2,477 passengers (-21.6 percent) in June 2011 compared to June 2010.

Overall, the tourism sector carried on satisfactorily during the first half of 2011: total cruise passengers and stay-over arrivals went up by 10.7 percent and 5.9 percent respectively, pushing up tourism receipts close to 6.0 percent, compared to the same period of 2010.

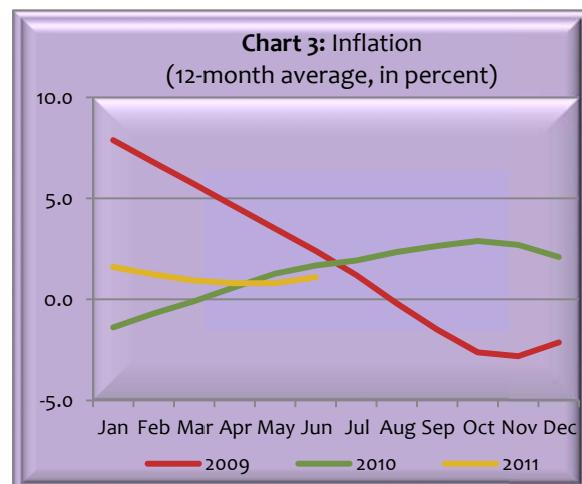

Inflation

The consumer price index (CPI) for June 2011 registered a 4.9 percent hike compared to the same month of 2010, meaning that the CPI continued its upward trend when measured on a month end basis (Chart 2).

The components that contributed mostly to this acceleration were gasoline and diesel (+1.6 percentage points), and electricity, gas and other fuels (+0.9 percentage point). Together, these components account for 13.0 percent of the CPI. When excluding the food and energy components, the CPI recorded an increase of 1.5 percent.

The 12-month average inflation rate, an indicator of the trend in inflation, reached 1.1 percent in June 2011 (Chart 3). When excluding the energy and food components from the CPI, this resulted in a deflation of 0.1 percentage point.

Government revenue

In June 2011, tax revenue recorded an Afl. 269.6 million decline compared to June 2010. The reason for this downswing is the incidental receipt of Afl. 259.9 million in the corresponding month of last year as a result of the tax agreement between the Valero Refining Co. and the government of Aruba.

The following analysis is excluding this incidental receipt. When doing so, total tax revenue decreased by only Afl. 9.7 million. The

main causes of this decline were the drop in receipts from taxes on income and profit by Afl. 8.7 million, in part because income from wage tax went down by Afl. 7.7 million, while proceeds from profit tax fell by Afl. 3.0 million. In addition, receipts from taxes on services also declined (-Afl. 2.5 million), mainly associated with the introduction of the tourist levy¹.

On the other hand, revenue from taxes on commodities, turnover tax, and foreign exchange tax increased by, respectively, Afl. 1.9 million, Afl. 1.1 million, and Afl. 1.0 million.

II. Operations of the CBA

On June 22, 2011, the CBA assisted the government with the placement of, respectively, Afl. 93.8 million in 12-year government bonds at par with an annual yield of 5.2 percent and Afl. 100.0 million in 15-year government bonds at par with an annual yield of 5.4 percent on the domestic market. The proceeds from these bonds issuance were in order to repay maturing debt and to cover part of the Afl. 325 million budgeted financial deficit for 2011.

¹ The tourist levy replaced the hotel room tax as of January 1, 2011. The tourist levy proceeds goes directly to the Aruba Tourism Authority and, thus, do not form part of the tax income.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
