## I. Main economic indicators

### Monetary developments

In May 2011, the money supply contracted by Afl. 16.2 million to Afl. 3,216.6 million after recording increases in the previous three months. The fall stemmed from a decrease in the net domestic assets (-Afl. 3.4 million) and a net outflow of funds (-Afl. 12.8 million). As a result of the latter, the net foreign assets (excluding revaluation differences of gold and foreign exchange holdings) went down to Afl. 1,330.5 million (Chart 1). This is Afl. 196.6 million (-12.9 percent) less than the amount recorded in May 2010. Afl. 1,103.1 million or 82.9 percent of these reserves were held by the Centrale Bank van Aruba (CBA).

The small decrease of Afl. 3.4 million in the net domestic assets was primarily associated with an Afl. 13.8 million rise in government deposits. Claims on the private sector mitigated the decline in money supply by Afl. 10.3 million, as credit to enterprises and housing mortgages grew by Afl. 11.3 million (1.1 percent) and Afl. 2.7 million (0.3 percent),

respectively. Consumer credit, however, fell by Afl. 3.1 million (0.6 percent).

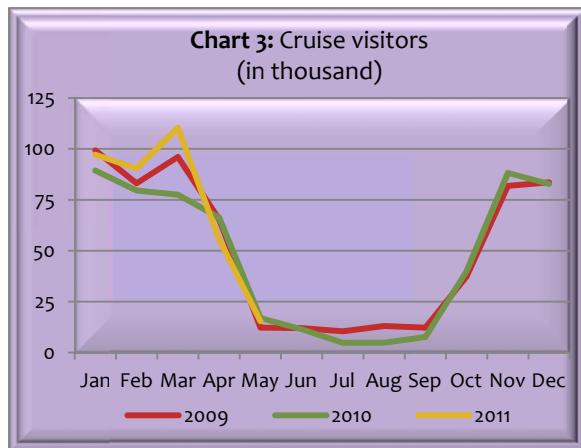

### Tourism

During the first half of 2011, total stay-over visitors went up by 5.9 percent (24,105 more visitors) when compared to the same period of last year. This result was particularly thanks to significant increases of tourism from Venezuela and Colombia, which grew by 38.5 percent and 30.8 percent, respectively, from January to June (13,647 more visitors). On the other hand, U.S. arrivals fell by 1.1 percent during the same period. In May 2011, the tourist sector performed moderately. The number of tourist arrivals went up by 1.5 percent when compared to May 2010 (Chart 2). In June, however, visitor arrivals grew markedly, i.e., by 13.1 percent. The increase in June was driven by a strong performance from the South and Central American region (+ 47.4 percent) and a solid growth from the U.S. market (+4.5 percent).

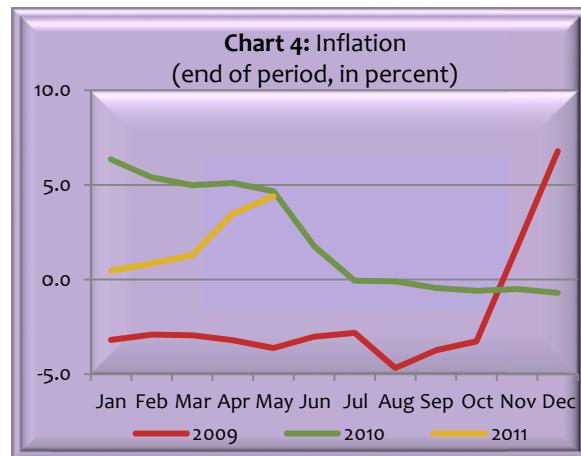

Contrary to stay-over visitors, the number of cruise passengers declined by 9.1 percent in May 2011, despite the arrival of 2 more ships to

Aruba (Chart 3). However, the year to date number (January to May) shows a notable 11.9 percent rise in cruise passenger arrivals.

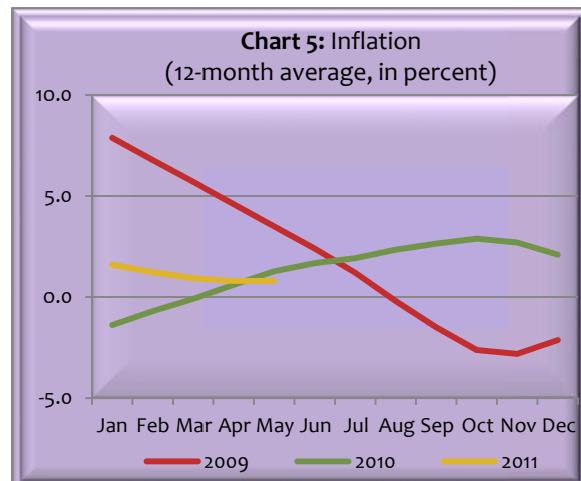

### Inflation

The consumer price index (CPI) for May 2011 registered a 4.4 percent increase compared to the same month of 2010 (Chart 4). May is the fifth consecutive month in which the inflation had accelerated. The components that contributed mostly to this growth were gasoline and diesel (+1.5 percentage points), and electricity, gas and other fuels (+0.9 percentage point). The CPI excluding the food and energy components recorded an increase of 1.4 percent.

The 12-month average inflation rate, an indicator of the trend inflation, remained at 0.8 percent in May 2011 (Chart 5). When excluding the energy and food components from the CPI a deflation of 0.4 percentage point was registered.

### Government revenue

Tax revenue developments continue to indicate a sustained economic recovery. In May 2011, government tax revenue went up by Afl. 17.4 million (+26.8 percent) to Afl. 82.3 million, when compared to May 2010 (Table A). Revenue from income and profit

taxes rose by Afl. 11.3 million, while commodity taxes also noted a strong growth, expanding by Afl. 8.9 million. However, the latter is in part explained by an Afl. 5.0 million increase in excise taxes on gasoline related to collection arrears. Import duties grew by Afl. 2.8 million to Afl. 12.9 million, continuing its upward moving trend, while turnover tax revenue rose by Afl. 1.1 million (+19.3 percent).

On the other hand, the Afl. 2.6 million decline in receipts in taxes on services partially mitigated this outcome, mainly associated with the introduction of the tourist levy<sup>1</sup>.

Proceeds from the tourist levy amounted to Afl. 5.1 million in May 2011, which is Afl. 2.1 million more than the income received from the hotel room tax in May 2010, primarily the result of the hike in rates in the second half of 2010.

Furthermore, income from taxes on property recorded a decline of Afl. 1.5 million, compared to May 2010.

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.
