I. Main economic indicators

Monetary developments

In December 2020, money supply increased by Afl. 108.5 million to Afl. 4,792.0 million, compared to November 2020, resulting from an expansion in the net domestic assets (+Afl. 146.4 million) and a decline in the net foreign¹ assets (-Afl. 37.9 million (Chart 1).

Source: Centrale Bank van Aruba

¹ Excluding revaluation differences of gold and foreign exchange holdings.

Money, as a component of broad money, grew by Afl. 79.2 million to Afl. 2,729.6 million, resulting from increases in both demand deposits (+Afl. 74.5 million) and money in circulation (+Afl. 4.8 million). The rise in demand deposits resulted from an expansion in the deposits denominated in Aruban florin (+Afl. 61.7 million) and the deposits denominated in foreign currency (+Afl. 12.7 million). Quasi-money rose by Afl. 29.2 million to Afl. 2,062.5 million, due to increases in time deposits denominated in Aruban florin (+Afl. 19.8 million) and savings deposits denominated in Aruban florin (+Afl. 11.5 million).

The growth in the domestic component of money supply was caused by increases in both the domestic credit (+Afl. 146.4 million) and the non-credit related balance sheet item (+Afl. 12.7 million). The expansion in domestic credit resulted from higher net claims of the banking sector on the public sector (+Afl. 156.6 million) and a decrease in the claims of the banking sector on the private sector (-Afl. 22.9 million). The growth in the net claims of the banking sector on the public sector was caused by a decrease in government deposits (-Afl. 139.2 million) and a rise in gross claims (+Afl. 17.4 million). The decline in the claims of the banking sector on the private sector (see Chart 2: Credit components) was the result of decreases in loans to enterprises (-Afl. 15.9 million), consumer credit (-Afl. 5.2 million), and housing mortgages (-Afl. 2.0 million).

Source: Centrale Bank van Aruba

In December 2020, net foreign assets of the banking sector decreased, due to net sales of foreign exchange of Afl. 212.5 million to the public, mainly associated with payments for goods imports, other services, and other investment. These were largely offset by net purchases of foreign exchange of Afl. 174.5 million from the public, mostly related to foreign exchange revenue from tourism exports and net transfer from foreign accounts (Table 1).

Table 1. Change in Net Foreign Assets (NFA) December 2020
(in Afl. million)

Net purchases of foreign exchange	174.5
Tourism services	109.3
Net transfers from foreign accounts	42.7
Capital account transactions	4.3
Direct investment	9.8
Government services	4.8
Transportation services	3.5
Net sales of foreign exchange	-212.5
Goods	-140.1
Other services	-26.8
Other investment	-18.9
Primary income	-10.5
Portfolio investment	-7.8
Items not yet classified	-7.2
Secondary income	-0.9
Financial derivatives	-0.1
NET CHANGE IN NFA (minus (-) denotes a decrease)	-37.9

Inflation

The consumer price index (CPI) for December 2020 noted a 3.1 percent decrease year-over-year (YOY) compared to a 2.7 percent decrease (YOY) for November 2020 (Chart 3).

Source: Centrale Bureau of Statistics

The main contributors to this decrease were the “Transport” and “Housing” components. With the exception of the components “Beverages and Tobacco Products” and “Education”, which remained unchanged, all other components noted decreases. Furthermore, by excluding the effect of food and energy², the core CPI declined by 1.4 percent (YOY) (Table 2).

² Partly affects the housing and transport components.

Table 2: COMPONENTS OF INFLATION

Inflation components	End-month inflation		12-month average inflation	
	Dec-19	Dec-20	Dec-19	Dec-20
Food And Non-Alcoholic Beverages	0.7	-0.3	1.1	-0.1

Government

Total government revenue amounted to Afl. 117.2 million in December 2020, Afl. 48.1 million less than the same month of the previous year.

The decline in government revenue resulted from a decrease in tax revenue (-Afl. 66.4 million) and an increase in non-tax revenue (+Afl. 18.3 million).

The reduction in tax revenue was mainly driven by decreases in income from income tax (-Afl. 23.1 million), profit tax (-Afl. 15.3 million), turnover tax (-Afl. 6.0 million), wage tax (-Afl. 5.1 million), and import duties (-Afl. 4.4 million).

Tourism

The number of stay over visitors amounted to 42,936 in December 2020, which is 57,777 less visitors (-57.4 percent) than in December 2019.

This decline was due to a reduction in all the markets. The North American market, the Latin American market and the European market decreased by of 47,445 visitors (-57.8 percent), 6,412 visitors (-75.9 percent), and 2,606 visitors (-34.9 percent), respectively.

The reduction in the North American market resulted primarily from less arrivals from the United States (-40,877 visitors or -54.8 percent). The decrease in the arrivals from the Latin American market was primarily due to less arrivals from Colombia.

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, fell by 52.6 percent to 389,305 compared to the same month of the previous year. The average intended night stays increased from 8.2 nights in December 2019 to 9.1 nights in December 2020.

Please note that no cruise visitors were welcomed during the month under review.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
