I. Main economic indicators

Monetary developments

In September 2020, money supply decreased by Afl. 87.9 million to Afl. 4,644.5 million, compared to August 2020, resulting from declines in both the net foreign¹ assets and the net domestic assets of Afl. 65.7 million and Afl. 22.2 million, respectively (Chart 1).

Source: Centrale Bank van Aruba

¹ Excluding revaluation differences of gold and foreign exchange holdings.

Money, as a component of broad money, declined by Afl. 82.1 million to Afl. 2,574.3 million, resulting from decreases in both demand deposits (-Afl. 80.3 million) and money in circulation (-Afl. 1.8 million). The reduction in demand deposits resulted from a decline in the deposits denominated in Aruban florin (-Afl. 96.0 million). In contrast, the deposits denominated in foreign currency (+Afl. 15.8 million) noted an increase. Quasi-money contracted by Afl. 5.8 million to Afl. 2,070.2 million, mainly due to reductions in time deposits denominated in Aruban florin (-Afl. 3.6 million) and savings deposits denominated in Aruban florin (-Afl. 1.9 million).

In September 2020, net foreign assets of the banking sector decreased, due to net sales of foreign exchange of Afl. 188.4 million to the public, mainly associated with payments for goods imports, primary income, other services, and other investment. These were largely offset by net purchases of foreign exchange of Afl. 122.7 million from the public, mostly related to foreign exchange revenue from tourism exports, portfolio investment, direct investment, and net transfer from foreign accounts. (Table 1).

Table 1. Change in Net Foreign Assets (NFA) September 2020 (in Afl. million)	
Net purchases of foreign exchange	122.7
Tourism services	39.9
Portfolio investment	39.0
Direct investment	17.7
Net transfers from foreign accounts	12.7

Other Investment	-13.8
Items not yet classified	-7.0
Financial derivatives	-0.1
NET CHANGE IN NFA (minus (-) denotes a decrease)	-65.7

Source: Centrale Bank van Aruba

The decline in the domestic component of money supply was caused by a decrease in the non-credit related balance sheet item (-Afl. 23.2 million). In addition the domestic credit increased by Afl. 1.0 million, resulting from higher claims of the banking sector on the private sector (+Afl. 28.0 million) and a decrease in the net claims of the banking sector on the public sector (-Afl. 27.1 million). The growth in the claims of the banking sector on the private sector (see Chart 2: Credit components) was the result of a rise in loans to enterprises (+Afl. 24.1 million), housing mortgages (+Afl. 6.0 million), and a contraction in consumer credit (-Afl. 2.1 million). The lower net claims of the banking sector on the public sector was caused by increases in both government deposits (+Afl. 75.8 million) and gross claims (+Afl. 48.7 million).

Inflation

The consumer price index (CPI) for September 2020 noted a 2.3 percent decrease year-over-year (YOY) compared to a 2.5 percent decrease (YOY) for August 2020 (Chart 3).

Source: Centrale Bureau of Statistics

The main contributors to this decrease were "Transport", "Housing", and "Household Operation" components. In addition, the "Food and Non-Alcoholic Beverages", "Clothing and Footwear", "Recreation and Culture", and "Miscellaneous Goods and Services" components also noted decreases. All other components remained unchanged. Furthermore, by excluding the effect of food and energy², the core CPI declined by 0.7 percent (YOY) (Table 2).

² Partly affects the housing and transport components.

Table 2: COMPONENTS OF INFLATION				
Inflation components	End-month inflation		12-month average inflation	
	Sep-19	Sep-20	Sep-19	Sep-20

The 12-month average inflation rate was 0.4 percent in September 2020, compared to 0.9 percent in August 2020 (Chart 4).

Source: Centrale Bureau of Statistics

Government

Total government revenue amounted to Afl. 63.2 million in September 2020, Afl. 43.8 million less than the same month of the previous year.

The decline in government revenue resulted from decreases in tax revenue (-Afl. 34.4 million) and non-tax revenue (-Afl. 9.4 million).

The reduction in tax revenue was mainly driven by decreases in income from turnover tax (-Afl. 7.3 million), wage tax (-Afl. 5.2 million), import duties (-Afl. 4.9 million), profit tax (-Afl. 4.5 million), and transfer tax (-Afl. 3.5 million).

Tourism

The number of stay over visitors amounted to 14,697 in September 2020, which is 58,931 less visitors (-80.0 percent) than in September 2019.

This decline was due to a reduction in all the markets. The North American market, the Latin American market and the European market decreased by of 41,436 visitors (-75.3 percent), 8,577 visitors (-99.7 percent), and 7,423 visitors (-90.4 percent), respectively.

The reduction in the North American market resulted primarily from less arrivals from the United States (-38,866 visitors or -74.2 percent). The decrease in the arrivals from the Latin American market was primarily due to less arrivals from Colombia.

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, fell by 78.8 percent to 112,484 compared to the same month of the previous year. The average intended night stays increased from 7.2 nights in September 2019 to 7.7 nights in September 2020.

Please note that no cruise visitors were welcomed during the month under review.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
