- 12. Consumer price index 22

I. Main economic indicators

Monetary developments

In January 2020, money supply expanded by Afl. 27.8 million to Afl. 4,597.2 million, compared to December 2019, caused by an increase in the net foreign¹ assets of Afl. 49.0 million, which was partly offset by a decrease in net domestic assets of Afl. 21.2 million (Chart 1).

Source: Centrale Bank van Aruba

Money, as a component of broad money, rose by Afl. 0.6 million to Afl. 2,575.5 million, resulted from an increase in demand deposits (+Afl. 2.1 million) and a decrease in money in circulation (-Afl. 1.5 million). The rise in demand deposits was due to an expansion in deposits denominated in Aruban florin (+Afl. 21.5 million), which was almost completely offset by a decline in deposits denominated in foreign currency (-Afl. 19.5 million). Quasi-money grew by Afl. 27.1 million to Afl. 2,021.7 million,

¹ Excluding revaluation differences of gold and foreign exchange holdings.

mainly due to increases in time deposits and savings deposits both denominated in Aruban florin of Afl. 24.3 million and Afl. 5.0 million, respectively. In contrast, savings deposits denominated in foreign currency noted a decrease of Afl. 2.2 million.

In January 2020, net foreign assets of the banking sector surged due to net purchases of foreign exchange from the public (+Afl. 334.2 million), mainly associated with foreign exchange revenue from tourism exports and direct investment. These were largely offset by net sales of foreign exchange to the public (-Afl. 285.1 million), mostly related to payments for goods, primary income, other investment, and other services (Table 1).

Table 1. Change in Net Foreign Assets (NFA) Jan 2020 (in Afl. million)	
Net purchases of foreign exchange	334.2
Tourism services	275.0
Direct investment	28.0
Items not yet classified	14.2
Transportation services	11.8
Portfolio investment	3.6

Government services	0.5
Net sales of foreign exchange	-285.1
Goods	-165.0
Primary Income	-31.9
Other investment	-31.3
Other services	-27.9
Net transfers to foreign accounts	-22.5
Secondary Income	-3.5
Capital account transactions	-3.1
NET CHANGE IN NFA (minus (-) denotes a decrease)	49.0

Source: Centrale Bank van Aruba

The contraction in the domestic component of money supply was caused by decreases in domestic credit (-Afl. 11.9 million) and non-credit related balance sheet items (-Afl. 9.3 million). The reduction in domestic credit was due to declines in both the claims of the banking sector on the private sector (-Afl. 9.6 million), as well the net claims of the banking sector on the public sector (-Afl. 2.4 million). The reduction in the claims of the banking sector on the private sector (see Chart 2: Credit components) was the results of a decrease in loans to enterprises (-Afl. 13.7 million). In contrast, consumer credit (+Afl. 3.4 million) and housing mortgages (+Afl. 0.7 million) increased.

Inflation

The consumer price index (CPI) for January 2020 noted a 5.5 percent increase year-over-year (YOY) compared to a 5.2 percent increase (YOY) for December 2019 (Chart3).

Source: Centrale Bureau of Statistics

The main contributors to this increase were the “Recreation and Culture” and “Food and Non-Alcoholic Beverages” components. “Communication”, “Health”, and “Education” components remained unchanged. “Housing” component noted a decrease, while all other components showed increases. Furthermore, by excluding the effect of food and energy², the core CPI grew by 4.2 percent (YOY) (Table 2).

Table 2: COMPONENTS OF INFLATION				
Inflation components	End-month inflation		12-month average inflation	
	Jan-19	Jan-20	Jan-19	Jan-20
Food And Non-Alcoholic Beverages	2.0	1.8	1.8	2.0
Beverages And Tobacco Products	0.1	0.1	0.0	0.1

Government

Total government revenue amounted to Afl. 122.8 million in January 2020, Afl. 1.8 million less than the same month of the previous year.

The reduction in government revenue resulted from a decline in non-tax revenue (-Afl. 8.3 million) and an increase in tax revenue in (+Afl. 6.5 million).

The decrease in non-tax revenue was due to lower other nontax revenues. The growth in tax revenue was mainly driven by an increase in income from income tax (+Afl. 6.7 million), transfer tax (+Afl. 6.7 million) and excises on tobacco (+Afl. 2.5 million). In contrast, income from profit tax (-Afl. 4.3 million), motor vehicle fees (-Afl. 3.1 million), wage tax (-Afl. 2.2 million) and import duties (-Afl. 1.9 million) decreased.

Tourism

The number of stay over visitors amounted to 90,623 in January 2020, which was 3,621 less visitors (-3.8 percent) than in January 2019.

This decline was mainly due to a reduction in the Latin American market of 5,260 visitors (-41.7 percent). This decrease was largely offset by an increase in the North American market of 2,889 visitors (+4.0 percent).

The decline in the Latin American market was caused by less arrivals from Venezuela (-3,198 visitors or -84.8 percent), while the upturn in the North American market resulted primarily from a growth in arrivals from the United States (+2,383 visitors or +3.6 percent).

In the month under review, total number of nights spent in Aruba, as indicated by the visitors, fell by 8.2 percent to 697,854, compared to the same month of the previous year. The average intended night stays declined from 8.1 nights in January 2019 to 7.7 nights in January 2020.

Source: Aruba Tourism Authority

The number of cruise visitors shrunk by 15,811 passengers or 12.3 percent to 112,614 in January 2020, compared to 128,425 in January 2019. The number of ship calls declined from 52 in January 2019 to 44 in January 2020.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.
